Mrs. S. D. Worden, who took first premium on Pansies, buys her seeds of Briggs & Brother.—Coudersport, Pa., Journal.

Mrs. F. D. WHEELER, at the late fair, exhibited some fine Stocks, La Superbe, New Rose and Dwarf Victoria Asters, which were awarded the first premium. All raised from seed grown by Briggs & Bro.—Ypsilanti, Mich., Commercial.

First premium on Pansies, awarded to T. W. CONKLIN. Seed from Briggs & Brother.—Lapeer, Mich., Clarion.

Mrs. R. CRAWFORD, best display of Plants and Flowers. Seed from Briggs & Bro.—Pittsfield, Mass., Eagle.

Mrs. S. E. SHARP, who received the premium for the splendid collection of Pansies exhibited, procured her seed of Briggs & Bro.—Chillicothe, Ohio.

MRS. H. B. WASHINGTON, who took premium on Pansies, buys her seed from Briggs & Bro.—Charlestown, Va., Sun. Each year I bought one dollar's worth of seed. I never purchased flower seed of any one else and am sure I never shall want to, so long as your seed proves so entirely satisfactory. My Pansies were perfect beauties, almost as large as any of which you make mention in your catalogue. Some of them measured two and three inches. They are the first Pansies I ever raised. Isn't that doing well?

GERRI LOWELL.

Booneville, Oneida Co., N. Y.

DAVID SANDHOVEL was awarded first premium on Pansies. Seed from Briggs & Bro.—Fulton, N. Y., Patriot and Gazette.

EDWARD A. Hay, Cooply, Pa. ** From the Pansy seed which I received from you, I raised flowers measuring two and one-half inches, and sold three flowers this day for twenty-five cents. I shall want more seeds for fall sowing.

EMMA M. EDDY received first premium on Collection of Cut Flowers, the seed of which came from Briggs & Bro.—Palmyra, N. Y., Courier.

The flowers entered by G. B. McGunn, were very fine. First premiums were awarded nearly all his collection. The seeds were purchased of Briggs & Brother.—Journal, Iowa.

MRS. M. A. MASTERS received first premium on Cut Flowers, the seed of which came from Briggs & Brother.—Palmyra, N. Y., Courier.

Miss Carrie Douglass. They were grown from Briggs & Bro.'s seeds.—Montpelier, Vt., Messenger.

The beautiful display of flowers made at the County Fair by Miss Carrie Douglass was the first premium. The flowers were all grown from seeds purchased of Briggs & Brother.—Great Falls, N. H., Journal.

MRS. A. M. MASTERS obtained first premium on best Cut Flowers, the seed of which came from Briggs & Bro.—Greenville, O., Times.

Mr. and Mrs. A. W. Huling took forty-one premiums at the Clermont Co., O., Agricultural and Horticultural Exhibition on the products of Briggs & Brother's seeds.

P. H. Skaggs, Blue Sulphur Springs, West Va. ** I must say that the second season bought of you are cheaper and of a better quality than I can get of any other dealer.

On receipt of the amount of the order, it will be forwarded by mail to any address in the United States, and postage prepaid. The above offer is mean to be for Flower and Vegetable Seeds, in packets only, and does not apply to seeds by the ounce, quart, pint, &c.

Our Packets are full size. We put up one-half size Packets.

Our Catalogue prices of Packets, and the price of all other seeds, we think, are, on an average, from 10 to 20 per cent. less than the Catalogue prices of any other party.

Have in mind too the fact, that nothing is to be added to our prices to cover postage and express charges. Other parties require 15 cents per lb., and 30 cents per qt., to be added to their prices.

Our Seeds are not surpassed in any Fly.
NOVELTIES IN VEGETABLES, ETC.

Nothing to be added to our Prices for Postage and Express Charges.

In making up your orders we desire that you will have in mind the fact that nothing is to be added to our prices to cover postage and express charges, as is required by other parties. At our prices we pay all charges, except on Beans, Corn and Peas at bushel rates.

BEAN, Cleveland's Round Pod - Red Valentine. — It is claimed that this improved Valentine Bean is ten days earlier than any other now known. The Round Pod Red Valentine is cultivated for its tender and very fleshy pods, which remain long on the plants without becoming hard and tough. They make an excellent, brittle pickle, and when cooked are not excelled by any other dwarf variety. Pkt., 10c.; 1-2 oz., 25c.; oz., 40c.; 2 oz., 75c.; 1-4 lb., $1.25; 1-2 lb., $2.25; lb., $4.

BEAN, Low Champion. — Mr. Low says of it: "This new Bean, originated by me and sent out for the first time the past season, only in packets, is one of the best Beans ever introduced. It is an excellent shell bean and as a string bean has but few, if any, equals. It is abundantly productive, pods are large, long and handsome, and the bean, when ripe, is of a beautiful bright red color, and of the finest flavor either green or dry." Pkt., 25c.; 1-2 pt., 35c.; pt., 60c.; qt., $1.00.

BEAN, Boston Favorite Bush. — For two or three years past there has been brought into Boston market a very handsome large, red pod bush bean, which has been quickly taken by dealers at high prices. It is being so highly esteemed in the Boston market it has been named "Boston Favorite Bush Bean." It is remarkably productive, has a large, red, showy pod, very tender as a string bean, and as a shell bean is ahead of all others. Pkt., 10c.; 1-2 pt., 25c.; pt., 40c.; qt., 75c.

BEANS, Best of All. — This variety, imported by us last winter from Germany, and catalogued at page 32, after testing it the past season, desire especially to recommend it as a superior string bean. It is early and very productive. The pods are of a green color, large, stringless, fleshy, tender, and of the finest flavor. Try it Pkt., 10c.; 1-2 pt., 25c.; pt., 40c.; qt., 75c.

BEANS, Longsword French. — This remarkably productive and fine-flavored Dwarf French Bean is the earliest and finest variety grown. It is distinct both in seed and habit, bearing as many as thirty to thirty-five pods upon a single plant. Pkt., 25c.

BEANS, Dwarf Mont d'Or. — See page 31 for this and other novelties in Beans.

BEET, New Eclipse. — A German variety, claimed by some to be better than the Dark Red Egyptian Turnip Beet and superior for market purposes. Pkt., 10c.; oz., 15c.; 2 oz., 25c.; 1-4 lb., 35c.; 1-2 lb., 60c.; lb., $1.00.

SUGAR BEET, Carter's Sugar Cane. — "We challenge any other Beet in cultivation to equal this in the production of sugar." So say Messrs. Carter, Dunnett & Beale, the originators. Pkt., 25c.; 1 oz., 10c.; 2 oz., 15c.; 1 lb., 25c.; 1-2 lb., 40c.; 1 lb., 75c.

BEET, Mangold Wurzel Golden Yellow Mammoth. A yellow-fleshed variety. This quite distinct sort is a cross between the Long Yellow and Golden Tankard varieties. In form and size it closely resembles the "Red Mammoth." The flesh, leaf-stalks and mid-ribs of the leaves are golden yellow. It is a heavy grower, the root grows about half above the ground, and like that of other yellow-fleshed varieties is very rich in saccharine matter. Pkt., 10c.; oz., 15c.; 2 oz., 25c.; 1-4 lb., 40c.; 1 lb., 75c.; lb., $1.50.

CABBAGE, Filderkraut. — See page 34.

CABBAGE, Henderson's Selected Flat Dutch. — One of the best Flat and Winter Cabbage grown. Pkt., 10c.; oz., 25c.; 2 oz., 45c.; 1-4 lb., 80c.; 1-2 lb., $1.50; lb., $2.50.

CABBAGE, Improved American Savoy. — The best Savoy Cabbage grown. See page 34.

CABBAGE, New Garfield Pickler, Pointed, Red Variety. See page 34.

CARROT, Carter's Gatepost Orange. — Messrs. Carter, Dunnett & Beale say of this: "We now introduce to our clients a larger Orange Carrot than has ever before been produced, the result of many years high cultivation and careful selection. The roots grow to immense size, approaching that of the ordinary Long Red French. It is very clean in growth, and is unusually high out of the ground, its enormous size and excellent feeding properties rendering it of great value to the stock farmer. We anticipate a great demand for this Carrot." Pkt., 10c.; oz., 25c.; 2 oz., 40c.; 1-4 lb., 75c.; 1-2 lb., $1.25; lb., $2.25.

CAULIFLOWER, Henderson's Early Snowball. — For forcing under glass during winter and spring, this Early Snowball variety is well adapted, and it may be stated that it does equally well for late planting. In original packets 50c per pkt.

CAULIFLOWER, Early Snowball, True Stock. — Pkt., 10c.; oz., 25c.; 2 oz., 40c.; 1-4 oz., 75c.; 1-2 oz., $1.75; oz., $.3.

CAULIFLOWER, Italian Early Giant, Earlftariest Dwarf and other choice varieties. See page 35.

CELERY, Solid Ivory. — Messrs. Carter, Dunnett & Beale say of this: "After giving many years careful attention to the cultivation of Celeries we are able to recommend our Solid Ivory as the finest type of a dwarf white celery grown." See also page 35 for prices, etc.

CELERY, Henderson's White Plume. — Our stock of this celery is directly from Mr. Henderson. See remarks, prices, etc. at page 35.

CELERY, White Plume, True Stock. — Pkt., 25c.; 1-2 oz., $1.75; oz., $.3.

CELERY, Henderson's Dwarf White. — See page 35 for this and other choice sorts.

CELERY, Henderson's New Rose. — Stock directly from Mr. Henderson. Pkt., 25c.; 1-2 oz., $1.50; oz., $.50.

CELERY, Golden Dwarf and New Golden Heart. — See page 35.

CORN, Early Marblehead. — This is a dwarf variety of Sugar Corn, ears small and the earliest of all the varieties of sweet corn. Pkt., 10c.; 1-2 pt., 15c.; pt., 25c.; qt., 40c.

CORN, Egyptian. — A tall, late variety of sweet corn, coming in after Stowell's Evergreen. The ears are very large and the flavor rich and sweet. Superior in these respects. Pkt., 10c.; 1-2 pt., 15c.; pt., 25c.; qt., 40c.

CORN, Amber Cream. — An excellent, new, second early sweet corn; ears to 14 inches long, with very deep kernels; rich, sugary and tender. Pkt., 10c.; 1-2 pt., 15c.; pt., 25c.; qt., 40c.

KALE, Carter's Welsh. — "A distinct and superior variety, the leaves being exquisitely fringed and curled to a degree unknown in this useful winter vegetable. The whole of the plant is in a condition for the table, and is of delicious flavor. The general appearance of the plant is most striking and pleasing." Pkt., 25c.
LETTUCE, Solid-Headed Yellow or Yellow Seeded Butter.

LETTUCE, Golden Spotted.

LETTUCE, Black Seeded Simpson.

LETTUCE, New Salamander.

For above Lettuces, see page 37.

LETTUCE, New Oak Leaved.—Stock from Mr. Henderson, who says of it: "A most distinct and beautiful new variety of Lettuce, offered for sale this season for the first time. The leaves are shaped like those of the oak; the heads are compact, crisp and tender, and it is largely free from that bitter taste peculiar to so many kinds of lettuce. It is claimed also that it is slow in running to seed. Pkt. 15c; oz. $2.

MUSK-MELON.—For the New Foreign Musk-Melons, Captain Larks, Emerald, Green Gem and Sir Garnet Wolseley, see page 38.

MUSK-MELON.—For the choice varieties, Montreal Market, Hackensack, and Improved Large Green Nutmeg, see pages 37 and 38.

MUSK-MELON, Hurf's True Banana.—"This melon grows to the length of twenty to thirty inches. The flavor far exceeds that of any other Cantaloupe, but many with it, as with Bananas, require to cultivate a taste for it. It should always be very ripe to be first quality." Pkt., 10c; oz., 25c; 2 oz., 35c; 1-4 lb., 60c; 1-2 lb., $1.00; lb., $2.00.

MUSK-MELON, Golden Gem.—"This valuable new Cantaloupe, first named by us three years since, is pronounced by all who have tried it the best ever grown. The shape is nearly round, very uniform in size, weighing from 1-2 to 2 pounds each, skin thickly netted, thick and rendered of flesh in color, inside of surface being a beautiful golden yellow. In quality and flavor it is superior to all other varieties, being uniformly rich, sugary and luscious; extra early in ripening, and producing better than any other variety we have ever known." So say the introducers. Pkt., 10c; oz., 15c; 2 oz., 25c; 1-4 lb., 40c; 1-2 lb., 75c; lb., $1.50.

WATERMELON, American Champion.—"This new melon, originated in Florida, and was first offered to the public last spring. It is a cross between Rattlesnake and Scaly Bark Melons. The skin is dark green, mottled with lighter shades; shape slightly oval; size large and remarkably uniform, varying from 25 to 50 pounds; rind very thin, yet remarkably firm; flesh tender, melting, retaining its freshness long after picking. Vines are of extraordinary vigor and astonishingly productive." Pkt., 15c; oz., 25c; 2 oz., 40c; 1-4 lb., 75c; 1-2 lb., 1$, 50; lb., $3.00.

WATERMELON, Pride of Georgia.—This melon originated in the County of Monroe in the State of Georgia. The introducer says of it: "We consider this melon the par excellence, superior to all melons of which we have any knowledge. It is a dark green mottled color, nearly oval, ridged like an orange; firm, will ship well, and when well cultivated, and in good soil, attains a large size. That which we claim for this melon above all others is, that for crispness and flavor, it stands among all the various types of melons as did Saul among the children of Israel head and shoulders above them. First time introduced. Pkt., 25c; 1-2 oz., 30c; oz., 50c; 2 oz., 90c; 1-4 lb., $1.75; 1-2 lb., $3; lb., $5.

WATERMELON, Mammoth Iron Clad.—"This melon originated with a prominent melon grower in South Delaware, and resembles in its markings the popular Cuban Queen. In shape and seed, however, they are quite distinct, being deeper and fuller at both ends, with seeds of drab white color. They grow uniformly large, specimens having been grown weighing seventy-five pounds each; are enormous yielders; flesh very red and of excellent flavor. Very hard and extremely tough and hard, thus rendering them valuable for shipping, while its keeping qualities are not surpassed by any other melon." Pkt., 15c; oz., 25c; 2 oz., 40c; 1-4 lb., 75c; 1-2 lb., $1.50; lb., $3.

WATER-MELONS, Scaly Bark and other choice and popular varieties see page 38.

WATERMELON, "The Boss."—A new and distinct variety. So uniform in size, they come in shape, color and size, that it would be impossible to select one melon which surpassed any other. Skin is black in color; flesh deep scarlet, unusually sweet, very billowy and melting. The rind is very thin and tough; ripens early and is enormously productive. Pkt., 10c; oz., 20c; 2 oz., 35c; 1-4 lb., 60c; 1-2 lb., $1; lb., $1.75.

ONION, Carter's New Pyramidal Vesuvius.—A distinct novelty for the first time offered. It is of the Tripoli type, of mild flavor, most distinct in form, and unique in color, and is certain to secure speedy popularity. Pkt., 15c; oz., 25c; 2 oz., 40c; 1-4 lb., 60c; 1-2 lb., $1.25; lb., $2.25.

PARSLEY, New Perpetual.—A most distinct and valuable variety, that does not annually run to seed. It has stood without "running away" upon the same land with us for four years, and being of the best curled type, its value is great where a perpetual supply is required. Pkt. 20c.

PEAS.—For Premium Gem, American Wonder, Telephone, Pride of the Market, Stragetam, and other new and choice varieties, see pages 40 and 41.

PEA, Clinton.—For New York.—This new variety is highly recommended as very early, very productive and of excellent quality. We have space for only one of the many statements with reference to this pea. "I tested Cleveland's Rural New Yorker Pea in 1883, and found it to be in all respects equal, and in several respects superior, to other strains Early Peas tested in the Rural experimental grounds." E. S. Carman, Editor Rural New Yorker. Pkts., 15c; 1-2 pt., 25c; pt., 40c; qt., 75c.

PEPPER, Ruby King.—"This new Pepper grows to a larger size than the Spanish Monstrous, and of different shape. The fruits are from 7 to 8 inches long by about 4 inches through, of a bright red color; remarkably mild and pleasant in flavor, and can be sliced and eaten with pepper and vinegar like Tomatoes, making a very pleasant salad. The Ruby King will occupy a similar position among Red Peppers as Golden Dawn among the yellow sorts." Pkt., 15c; 1-2 oz., 25c; oz., 40c; 2 oz., 75c; 1-4 lb., $1.25.

PEPPER, Golden Dawn. See page 41.

RADISH.—For Olive-Shaped, Globe-Shaped, Turnip-Shaped, and Long Rooted, new and other choice varieties of all colors, see pages 41 and 42.

SPINACH, Carter's Market Favorite.—"We highly recommend this for the American market. It surpases all others for its thick texture of leaf and duration of the leaf. A very popular variety." Pkt., 5c; oz., 10c; 2 oz., 15c; 1-4 lb., 25c; 1-2 lb., 40c; lb., 75c. See page 42 for description but not for price.

SPINACH.—For other new and choice Thick-Leaved varieties, see page 41.

SQUASH, Mammoth Chili.—"Grows to an enormous size, often weighing over 200 pounds. Excellent for all uses." Pkt. 10c; oz., 25c; 1-4 lb. 80c;

SQUASH.—For Essex Hybrid and other new and choice varieties, see pages 42 and 43.

TURNIP, Carter's New Purple-top Strap-leaf Yellow.—"A new variety of the Dutch type of quick growth. The flesh is excellent, the leaf has exceedingly fine texture and delicious flavor; top deep purple, giving it a very handsome appearance. Pkt., 10c; oz., 15c; 2 oz., 25c; 1-4 lb., 40c; 1-2 lb., 75c; lb., $1.25.

TURNIP.—Would refer the reader to page 44, 45 and 46 of this catalogue, where he will find a long list of the newest varieties of turnips, with descriptions and prices.

TOMATO.—For Early Mayflower, Carter's Dedham, Favorite, Livingston's Perfection, Livingston's Favorite, Essex Hybrid, and other new and choice varieties, see pages 43 and 44.

TOMATO, Carter's Perfection.—"Awarded First Prize—Carter's Perfection—New York Agricultural Society, August 22, 1884." "Undoubtedly the finest novelty in Tomatoes for many years. It is a prodigious cropper, very handsome in form, distinct in color and of exquisite flavor. Immensely superior to any other variety named 'Perfection,' already in commerce. Per pkt., 25c.
ABRONIA umbellata grandiflora. See page 3.

ABRONIA, villosa. See page 4.

ACROCLINUM ROSEUM, New Double, Large Flowering. A distinct double form of this pretty annual, possessing all the delicate tints and shades of color peculiar to the single variety. For bouquets or wreaths nothing more beautiful in the way of Immortelles has been introduced. Pkt, 10c.

ACROCLINUM ALBUM, New Double, Large Flowering. White.—Flowers like the Roseum, except in color. Pkt, 25c.

ALYSSUM, Benthami compactum.—A new and very pretty variety, of the well-known Sweet Alyssum, growing to the height of about six inches. Flower spikes pure white. Pkt, 10c.

ASTER, Victoria, Sulphur Yellow.—A pleasant, light yellow, new color in Asters. Pkt, 20c.

ASTER, Victorian Dwarf, Sulphur Yellow.—More dwarf than the above; flowers the same. Pkt, 20c.

BALSAW, "Challenger Prize."—The most magnificent, perfectly double Balsam in cultivation. The colors are brilliant, comprising Pure White, White shaded with Pale Lemon, Cream White, Salmon Rose, Rich Crimson, Deep Pink, Violet, Bright Purple, Plum, and superbly mottled varieties. Pkt, 10c.

CANDYTUFT, New Dwarf or Tom Thumb hybrids, (Iberis Nana Hybrida), Alba (white), Carna (flesh-colored), Lilacina, (Iac), Purpurea (purple), Roseus (rose-colored). These colors separate or mixed, each pkt, 10c.

COCKSCOMB, Carter's Empress.—The finest Cockscob in cultivation. The color is a bright crimson, with a rich velvety appearance. It is extremely double and well formed. Specimens have been exhibited measuring 33 inches from seed to point, and 10 inches across. Pkt, 20c.

CHRYSANTHEMUM cornarium, (tricolor), Eclipse.—Exceedingly showy, new variety, resembling in form of flower the well-known Chrysanthemum Burridgeanum, but surpassing it greatly by its striking colors which are pure golden yellow, with a bright purplish crimson ring or center in the ray flowers, the disk being dark brown. Pkt, 20c.

CHRYSANTHEMUM coronarium, Sulphureum Flore Pleno.—Flowers very double and of a most delicate lemon or sulphur shade. Fine for bouquets or for general decorative purposes. Pkt, 20c.

COBAREA scandens alba.—A pure white flowering variety. Pkt, 20c. See page 10.

DOUBLE DAISY, "Lunafellow." (Bells perennial flore pleno).—$The flowers of this variety are of unusual size and doubleness, and are of a dark rose color. Fine for bouquets. Pkt, 20c.

DELPHINUM (Imperiale alba flore pleno), Emperor, Larkspur, Pure White.—This new pure white flowering variety will be greeted as a welcome addition to the other colorful and semi-double flowering sorts. Pkt, 25c.

DIANTHUS Hedewigii, Diadematus, and Eastern Queen and Crimson Belle, are the most showy varieties of the annual-flowering Dianthus. See pages 8 and 9.

EUCRISANTHEMUM DWERI.—A rare and truly magnificent species of dwarf, spreading habit of growth. The color of the flowers is that of purple rose, shading to white in the center. It flowers profusely and is of the same easy culture as the different kinds of Clarkia. Pkt, 10c.

NEW GODETIA, "Lady Satin Rose".—Admitted to be the most unique introduction of modern times. Unequaled for brilliancy, general beauty. Fine for groups or pots. 10c.

NEW GODETIA, "Spotted Carpet."—A charming petticoat variety, forming a curious carpet-like bush, bearing clusters of chaste and pretty flowers of pure white ground, with a bright carmine spot at the base of each petal. Pkt, 10c.

IMPATIENS SULTANA.—A new perennial Balsam which though specially suited for decorative purposes in the hot-house and green-house, has also proved to be most valuable for summer bedding. Flowers are of brilliant rose-scarlet, and produced so profusely that a plant appears to be a perfect ball of flowers. Pkt, 25c.

IRIS ROBINSONIANA, (The Wedding Flower of Lord Howar's Island).—This gigantic species attain a height of 6 feet or more, with large sword-shaped leaves and large pure white flowers, marked with golden yellow on center petals. The flowers are about 4 inches in diameter and quickly fade, but as they are very numerous and quickly succeed each other, the plant retains its beauty for a long time. Pkt, 20c.

MARIGOLD, Compact French Gold-Striped.—An unequalled variety for bedding; height about 6 inches by 12 inches in diameter; very dense and thickly studded with large flowers regularly striped with chestnut brown on bright yellow ground. Pkt, 10c.

MIGNONETTE, New Large-Flowering White Upright.—A vigorous grower and produce flowers, giving rise to blooms, 12 to 15 inches in length. An exceeding fragrant, white-flowered variety. Pkt, 10c.

MIGNONETTE, "Macchet."—A splendid Reseda. The dwarf and vigorous plants are of pyramidal growth, and furnished with very thick, dark green leaves; they throw up numerous stout flower-stalks, terminated by massive spikes of delicately tinted red flowers. A distinct sort. Pkt, 10c.

MIGNONETTE, Golden Queen.—For this and other splendid varieties, see page 11.

MIMULUS, Carter's New Queen's Prize.—A most magnificent strain of this easily cultivated and brilliant-colored flower. Many of the flowers measure from 2 to 3 inches in diameter, the color comprising exquisite mottled shades of rich purple, crimson, yellow, ruby, etc. Pkt, 20c.

NEW NASTURTIUM, "Lady Bird." A pretty and distinct Nasturtium. The ground color is rich golden yellow; each petal barred with a broad vein of light yellow. It is a charming addition to the Tom Thumb or Dwarf compact section. Pkt, 15c.

NASTURTIUM, "Empress of India."—Novelty of 1883. Awarded a first-class certificate by the Royal Horticultural Society of London. See page 12.

NEW NEMOPHILA, Atomaria Atro-Cerulea.—The color of the flower is a deep ultramarine, pure white center, with a zone of black purple. It was highly praised on the occasion of receiving the first-class certificate at South Kensington. Pkt, 20c.

PANSIES TRIMARDEAU, (Viola tricolor maxima).—An entirely distinct and beautiful new race of this popular flower. The plants are of a vigorous though compact habit; the flowers are carried well and each one is marked with three large blotches or spots, They are of a refined form and present a notable difference from those of all known races in being of a size hitherto quite unattained in this genus. The seed offered was saved exclusively from finely formed flowers of the richest and most varied shades of color. Pkt, 40c.

PANSIES, Carter's Inimitable.—The varied beauty of coloring and perfection of outline possessed by this strain of "Imitable" variety has obtained for it general praise. Seed saved by one of the greatest amateur Pansy growers of England. Pkt, 40c.

PANSIES, Carter's Fancy.—Flowers large and of the most showy and brilliant colors and markings. Pkt, 10c.

NEW SWEET PEA, "Adonis."—This very pretty and distinct novelty supplies a want long felt; the bright, rosy carmine or pink blossoms contrasting most pleasantly with the Pure White, Scarlet and other decided colors already in cultivation. Pkt, 20c.

PFUNIA, Carter's Emperor, Double Rosette.—The magnificent double flowers of Carter's Double Rosette Petunias are exquisitely fringed, and represent almost every shade of color. The seed may be relied upon to produce each from 25 to 30 per cent of double flowers. Eight distinct varieties, each including a variety of color, fringed, laced, scollop'd, etc. Pkt, 75c.
PANSIES, Odor and other splendid varieties, see pages 12 and 13.

PETUNIA, Fimbriata Delicata.—The refined form and the lovely colors of the Single Fringed Petunias afford sufficient reasons for the universal popularity which they have acquired. The present *Novelty* is highly characteristic of this class; its charming flowers are white, but the markings of the throat, and particularly the deeply fringed petals are of a most delicate and pleasing shade of rosy violet. Pkt. 50c.

PETUNIA, Grandiflora *Intus Aurea*.—These Petunias constitute a class of rare beauty, and have been found to come true from seed. The characteristics are very large sized flowers of faultless form, with a broad and deep yellow throat which is generally veined after the manner of the Salpiglossises. Pkt. 75c.

PETUNIA, (Grandiflora Fimbriata flore pleno.) "Lady of the Lake."—In fecundating the Petunia fimbriata alba with the pollen taken from this magnificent, Pure White, Double Fringed Petunia, the seed obtained will perpetuate the latter at the rate of about 30 percent. We now offer such seed and warmly recommend the cultivation of this splendid variety. Pkt. 75c.

PETUNIA, Double Lilliput, (Petunia nana compacta multiflora flore pleno.)—The dwarf, dense bushes, studded with numerous and exceedingly pretty, small, double flowers of the most charming colors, are much admired. The flowers are spotted, striped and self-colored, and give to the plants an uncommonly pleasing appearance. The seed will produce from 50 to 60 per cent of doubles. Adapted to garden or pot culture. Pkt. 50c.

PHLOX DRUMMONDI.—For Novelties and other choice varieties in this class, see pages 14 and 15.

SCHIZANTHUS Pinnatus Roseus.—The flowers of this *really beautiful* new annual are of a delicate rose color, shading at the center to white, whereas the uppermost petal is almost entirely covered with a blood-red spot. This Novelty is quite distinct from existing Schizanthes. Fine for masses and borders; continuing long in bloom. Pkt. 20c.

SALVIA, "Blue Beard."—A new and very distinct, hardly annual of branching habit, growing to height of about one foot, with square stems and sage-like leaves. It is a unique and beautiful plant. Pkt. 40c.

STATICE Swiseoroi.—One of the finest and showiest of all annuals, producing branching flower spikes of a very bright rose, with a crimson shade, fully 15 to 18 inches in length, and from 1-2 to 1 inch in breadth. Plants will last in flower more than two months. A whole bed of this lovely plant in full bloom is a truly magnificent sight, being one mass of flowers. Pkt. 20c.

STOCK, Giant Perfection, Ten Weeks.—For this and other fine varieties of Stock, see page 17.

VERBENA, (Hybrida coccinea folis aureis,) New Golden-Leaved Scarlet Verbena.—An interesting and effective Verbena, with golden foliage, which strikingly contrasts with the bright scarlet color of the flowers. Pkt. 20c.

ZINNIA, New Pompone.—A beautiful new strain. The color of the flowers are bright and showy, embracing all the shades of crimson, yellow, purple, white, rose and orange, usually found in the Zinnia. The flowers are about half the size of ordinary Zinnias, and are most distinct and beautiful. Pkt. 20c.

AGRICULTURAL IMPLEMENTS & MACHINES.

We have on sale the following IMPLEMENTS and MACHINES, and also EXTRAS and REPAIRS belonging thereto, and also TWINE for Binders.

We store and have the distribution of the following Machines, Repairs, &c., for Messrs. F. Porter Thayer & Son.

The Esterly Light Draft Twine Binder Harvester, a model of simplicity, durability and effective working.

The Esterly Encased Gear Mower, for two horses. The latest improvement in mowers.

Preston's Improved Binder Trucks. Each owner of a Self-Binder should have a Truck.

The Chieftan, and the Allen Hay Tedders. Indispensable for scattering grass for drying.

Golden Self Dump Foenner Sulkey Rakes.

Also the celebrated Horse or Hand Dump Rake.

Horse Hay Carrier and Forks, for unloading Hay and Straw, newest and best patterns.

The Clipper Spring Harrow.—The best in the world.

La Dow's Jointed Pulverizing Harrows—Light, simple, durable and flexible. Thousands in use, giving entire satisfaction.

Little Giant Post Hole Digger. A tool of rare merit.

SEND FOR ILLUSTRATED AND DESCRIPTIVE CATALOGUES AND PAMPHLETS.

BRIGGS BRO.'S & CO., ROCHESTER, N. Y.
TO OUR FRIENDS.

We place in your hands our unpretentious-appearing Descriptive Seed Catalogue for 1885, with the request that you will look it through, compare its list of Seeds, its prices and terms, with the lists, prices and terms of other Seed Catalogues, and on your finding that all our terms, etc., are in your interest, trust you will favor us with your Seed orders, which we shall take pleasure in filling promptly.

We confidently believe it will be seen on comparison of our catalogue with others, that ours, though apparently small, contains a more complete and desirable list of Seeds, both Flower and Vegetable, than will be found in any other American catalogue, and we think our prices and terms will commend themselves. We have made them as favorable to the purchaser as we can possibly afford. In fixing prices, etc., we have taken into account the hardness of the times.

In comparing catalogues please take notice of the fact that, our prices include postage and express charges, on all Seeds at catalogue prices, except Beans, Corn and Peas at bushel rates. Nothing is to be added to our prices for postage, etc., as is required by other parties. We prepay at our prices.

As to the quality of our seeds we would state, that our American varieties are largely grown by ourselves on our own grounds from the best of stocks and with the greatest care, and the remainder by the old and reliable seed growers of the old firm of Briggs & Bro. Our foreign seeds are imported directly by ourselves from the most reliable seed growers of England, France, Germany, and Italy, and we procure the best that cash can purchase, both of Flower and Vegetable seeds.

The members of the old firm of Briggs & Bro. are with us, one of whom has made two European trips, visiting and making the personal acquaintance of the leading seed growers and seed dealers of the above mentioned countries. This member of the old firm, who has had more than forty years of practical experience in seed raising and the importation of seeds, makes our foreign orders and superintends our seed growing, a guarantee that all orders we may be favored with will be filled with seeds of the best quality.

We should be pleased to have you show this catalogue to your friends, that they may take advantage of our favorable terms and prices.

Respectfully,

BRIGGS BROS. & CO.,
Rochester, N. Y.

FLOWER SEEDS, NEW AND RARE.

Our list embraces the choicest in Asters, in Balsams, in Candytuft, in Canna, in Celosia, in Dianthus, in Mignonette, in Pansy, in Petunia, in Phlox, in Portulaca, in Stocks, in Verbena, in Zinnia, in Ornamental Climbers, in Everlasting Flowers, in Ornamental Grasses, in Biennials and Perennials and seeds for the greenhouse. No list equals ours in Pansy, Petunia, Phlox Dummondii, &c., in variety and quality.

NOVELTIES IN VEGETABLE SEEDS.

We offer Novelties in Asparagus, in Beans, (a fine list); in Beets, in Celery, (would mention "Solid Ivory" and White Plume), in Cucumber, in Lettuce, (rich collection); in Melon, both Musk and Water; in Onion, (several splendid varieties); in Parsley, in Peppers, in Radish, in Spinach, (rare kinds); in Squash, in Tomatoes, (all the favorites); and in Turnip, &c., &c, Please look through our list.
EXTRA INDUCEMENTS FOR THE FORMATION OF CLUBS.

There are many in a neighborhood who would not, perhaps, take trouble to get a Catalogue from us, but who would, if it were exhibited to them, purchase seeds to some extent, and, therefore, to induce those who may receive the Catalogue to call upon their neighbors, obtain their orders, and thus assist in enlarging our sales, we make the following liberal offer:

Parties remitting $1.00, may select Seeds in Pkts., at Catalogue prices, amounting to $1.20.

<table>

</tr>
</tbody>
</table>

On receipt of the amount of the order, the seeds will be forwarded by mail to any address in the United States, and postage prepaid. The above offer is meant to be for Flower and Vegetable Seeds, in packets only, and does not apply to seeds by the ounce, quart, pint, &c. The same terms as the above will be allowed to any one party ordering.

PACKETS ARE FULL SIZE AND LOW IN PRICE.

By comparing our Catalogue prices of packets with the prices of packets in other catalogues, it will be noticed that our prices average much less than those of any other party, and as a consequence, the purchaser of our seeds in packets, would get a larger number for a given amount of money than from any other party, and we want it understood, that our packets are full size—we put up no half size. Our seeds are also unsurpassed in quality.

NOTHING TO BE ADDED FOR POSTAGE OR EXPRESS CHARGES.

When seeds are ordered from us by the pkt., Oz., ¼ lb., ½ lb., Lb., ½ pt., Pt., or Qt., at Catalogue prices, nothing is to be added to an order for Postage or Express charges. Our prices include charges when ordered as above. Please have this in mind when comparing prices, as by other catalogues, parties ordering are required to add to their orders 16 cts. per lb., 15 cts. per pt., and 30 cts. per qt., for Postage or Express charges.

HOW TO SEND MONEY

If the following precautions are taken in the transmission of money, we will take the risk of the safe arrival of the funds, namely: by Post Office Money Order, Posta. Note, Express Money Orders, Drafts on New York, or small amounts in Registered Letters, and the cost of such Post Office Money Orders, &c., may be deducted from the remittances. Sums of Two Dollars or less, may be sent by mail at our risk without registering and may be sent in currency or Post Office Stamps.

PACKAGES SENT FREE AND GUARANTEED.

We will send small packages by mail, and the larger by Express, Prepay Charges, and guarantee safe delivery. If, after a reasonable time, a package should fail to reach the owner, we will, immediately after being notified of the fact, and receiving a duplicate of the order, with date, &c., refill the same and forward without additional cost to the party ordering.

Parties ordering seeds, will please state whether or not it is convenient to receive packages by Express, and name their nearest Express Office.

SEND MONEY WITH THE ORDER.

Please send pay at the time of ordering, as we do not keep any book accounts in the Mail Department of our business. Please show this Catalogue to your friends and send us combined orders, thereby saving time and trouble to all parties. Our terms for Club Orders are liberal.

Shall be pleased to mail our Catalogues free of charge to any parties desiring to purchase seeds.
ANNUAL FLOWER SEEDS.

THE FOLLOWING ARE FLOWERS THAT BLOOM THE FIRST SEASON FROM SEED.

ABRONIA.

<table>
<thead>
<tr>
<th>Species</th>
<th>Color</th>

Hybrid Nana - New dwarf hybrids, in splendid mixture, 8 inches.

Mixture of all sorts.

The Candytuft is an annual of easy culture, and very showy in beds, borders and ribbon beds, and indispensable for bouquets.

CANDYtuft.

In Splendid Mixture

Dark-leaved Varieties, in superb mixture

Collection of 12 DISTINCT VARIETIES, including plants of various heights and the richest foliage, in separate packets, each packet.

The same mixed in one packet.

CANDYtufts are large, superb foliaged plants of majestic and tropical appearance. The large leaved varieties are very ornamental, and make a fine show in groups or as single plants on lawns.

CATCHFLY - (Silene), Red, White, Rose, &c., mixed; brilliant and profuse-flowering, hardy Annuals of easy culture and of long duration in bloom; desirable for edgings, mixed borders, &c.

CELOSIA CRISTATA, (Cockscomb).

Dwarf Varieties - Good mixed, 2d quality.

" " - Finest, mixed, 1st quality.

Tall " - Good 2d quality.

" " - Finest, 1st quality.

The mixtures are dark purple, yellow, chamois, purple, rose, red, sulphur-colored, violet, &c.

New Variegated Dwarf - Early-flowered, 1st quality.

" " Tall - Early-flowered, 1st quality.

Variegated in stem, branch, leaf and comb.

Nana Empress - (New Giant maxima): New sort, producing very large bright purple combs with dark foliage; a beautiful variety.

Nana President Theirs - (Tom Thumb Glasgow Prize): very fine new dwarf sort, with dark leaves and crimson comb; quite distinct and constant.

New Japan - A new, distinct and beautiful variety.

" " variegated - a very showy sort.

The CRISTATA or COCKSCOMB styles of the Celosia are, from their peculiar growth, showy and interesting. The seed we offer is first quality - saved from the best combs only.

CELOSIA pyramidalis.

</tbody>
</table>

The Pyramidal Celosia are very showy, and especially beautiful are the PLUMOSA varieties with their large feathery spikes or Plumes of rich glossy colors. They are splendid in groups or as single plants.

CENTAUREA.

cyannus - (Bachelor's Button, or Corn Bottle); Various colors mixed, 2 feet.

nosehata coerulea - (Sweet Sultan); Blue, Red, White and Purple mixed, 1½ feet.

The above Centaureas are very showy, hardy Annuals, suitable for borders or may be grown in masses; fine for bouquets, &c.

For foliage Centaureas, look under the head of "Seeds for Greenhouse."

CENTRANTHUS - Red, white, bicolor, flesh-colored, &c., mixed; easy growing, quite showy, free-blooming, hardy Annuals, suitable for groups, masses, &c., 1½ feet.

CHLORA GRANDIFLORA - A plant of considerable worth, glossy, old-fashioned, attractive foliage, and small delicate, bright yellow flowers; blooms profusely.

CHRYSANTHEMUM:

tricolor Burridgeanum - White, with crimson band.

" " Dunnettii album, pl. - Immense double white flowers.

" " aureum, fl. pl. - Double golden yellow, brilliant.

" " hybridum, fl. pl. - Double; colors mixed.

" " Lord Beaconsfield - Crimson maroon edged and striped with a golden rim surrounding a rich brown eye.

" " The Sultan - Rich velvety crimson maroon, with golden rim surrounding a dark brown center.

" " W. E. Gladstone - A beautiful New variety.

ALL VARIETIES MIXED.

For other varieties of Chrysanthemum, look under the head of "Flowers that bloom the Second Season."

Chrysanthemums are among the most showy of summer-flowering plants and are fast coming into favor. Fine for cut flowers; height of plants from 1½ to 2 feet.

CLARKIA.

elegans, Single Varieties - Various colors mixed.

" " alba ll. pleno - Pure white, very double and pretty.

" " Carmine - New, double (Novelty of 1883), fine.

" " purple King - Rosy purple, new, intensely double.

- Hybrids diadematus—(Double Diadem Japanese Pink), true, extra fine. Flowers very double and of all shades of color; splendid and an unequaled strain.
- Hybrids albus fl. pl.—Splendid double white.
- A tropermureus fl. pl.—(Benary). Flowers large, dark blood red; extra.
- Fl. pleno—Dwarf double white, splendid.
- Laevis—Single mixed, extra fine.
- Fl. pleno—Saved only from the finest double varieties.
DIANTHUS—continued.

Hedwigi lachnatus striatus fl. pl.—BENARY'S STRAIN) double, striped, splendiferous............. 15

The flowers of the lachnatus Pinks are 2½ to 3 inches in diameter, and beautifully marked and fringed.

Eastern Queen—(New Japanese Pink). The introduction of this Pink, the Messrs. Carter, of London, say of it, "Flowers large and beautifully marked. The broad bands of rich mauve upon the pale surface of the petals are very striking, unique and beautiful."

Crimson Belle is also a New Japanese Pink, introduced by the Messrs. Carter, who say of it: "Flowers are of a rich, vivid crimson-like color, and of extraordinary size and substance and "beautifully marked." Both varieties come perfectly true from seed, and are REALLY SPLENDID.

imperialis fl. pl.—(DOUBLE IMPERIAL PINK)—Extra fine mixed............ 5

fl. albo pleno—Double white .................. 5

fl. alba striata pleno—White striped with purple .................. 5

atrosanguineo pleno—Double blood red, splendid, fine .................. 5

fl. pl. rubro striata pleno—Double, red striped, fine .................. 5

The Flowers of Imperialis fl. pleno-class of Dianthus, are large and of a great variety of delicate colors; very desirable.

latifolius hybridus—Double blood red, double rose-colored, double violet, &c., mixed, fine........... 5

nanus—(Dwarf), white, blood red, copper colored, rose, &c., mixed; all double .......................... 5

The profusion of large, richly colored, splendidly formed, and deliciously fragrant flowers of the DIANTHUS chinesis and its varieties, known as INDIAN and JAPAN PINKS, place it among the MOST DESIRABLE of flowering plants, SUPRA for Beds, Borders, and Baskets, and of easy culture. Height of the Dwarf Varieties, 8 to 10 inches, and of the Taller 13 to 15 inches. Our List embraces EVERY DESIRABLE kind. The Seed we offer is fresh, from the largest flower seed growers of GERMANY, and is of the BEST QUALITY.

For Carnations, Pincées, Sweet William, &c., look under head of "Flowers that bloom the Second Season."

ESCHSCHOLTZIA.

Single Varieties—Orange Yellow, White with Rose, and striped, mixed.................. 5

carminea grandiflora rosea—Large-flowered carmine rose; NOVELTY of 1889; very striking........... 15

crocea flore pleno—very fine, produces a large percentage of double orange flowers.................. 10

" " " alba—BENARY), double white, NEW introduction, fine.................. 10

Last Two DOUBLE Varieties MIXED.......................... 10

Mandarin—(CARVER), NEW; the outer side of the petals is brilliant scarlet, the inner side deep orange, splendiferous.................. 10

The height of Eschscholtzia is about 1 foot, foliage fine cut, flowers large, of various shades and abundant.

EUPHORBIA marginata—(Mountain of Snow), a variegated foliage plant, flowers small, white and inconspicuous, suitable for ribbon border, groups, or as single plants, 15 inches.................. 5

EUTOCA—Blue, dark blue, white striped and lilac, mixed; good for mixed beds, borders and bouquet making; 15 inches.......................... 5

FENZLIA dianthiflora—A charming little annual of dwarf habit, of beautiful foliage, bearing a perfect mass of flowers; useful for pots, baskets, edgings, &c., ½ foot.......................... 15

CAILLARDIA.

pieta—Red and yellow; brilliant red and orange, red bordered with white; fine red, &c., mixed; 15 inches 5

" Lorenziana—(NEW DOUBLE GAILLARDIA), one of the MOST STRIKING NOVELTIES OF 1883. For decorative purposes and bouquets it is invaluable; its gay and variously colored flowers are produced in abundance without intermission from July until frost sets in. Flower head 2½ inches in diameter; fine also for pot culture and forcing; 1½ foot.......................... 15

The older varieties are also very desirable.

CILLIA—All the varieties and colors MIXED. The Cillas are free-flowering hardy annuals with small flowers; fine for rock-work, &c.; 15 inches 5

CLAUCIUM corniculatum (HORNED POPPY)—Silvery leaved ornamental plant; fine for edgings, vases &c.; ½ feet.......................... 10

CODETIA.

" Bijou," "NOVELTY OF 1883,"—"Distinct from all other varieties of the genus. Flowers are of the finest white with a bright rose-colored spot at the base of each petal; plant 5 to 6 inches in height and forms a dense bush 1½ to 1½ inches in diameter covered with 250 to 300 flowers; fine for edgings, vases, &c." 15

"Duchess of Albany," "NOVELTY OF 1883.—"Plants about 1 foot high, of handsome, pyramidal shape, producing large clusters of a beautiful, glossy, satiny white, each flower when fully expanded measuring 4 inches across, and so profusely covering the plants as to render the foliage almost invisible."

Lady Allemarle—NEW, habit compact; flowers brilliant intense carmine crimson; beautiful; 1 foot 10

" " New Dwarf—Very fine.......................... 15

Lindleyana—Purple, carmine center; double rosy carmine; white, rose belt in center; white and scarlet, mixed; 15 inches.......................... 5

Whitneyi—MIXED, including Brilliant, which is a new and extra showy variety; ½ feet.......................... 5

All Varieties and Colors MIXED.................. 10

The Codetias will thrive in any good garden soil, and are of easy culture. Their profuseness of bloom and delicate tints of color render them very desirable. Attractive in beds, mixed borders and rockeries.

Grammanthes geutianoides—Blossoms rich orange scarlet, star-shaped and abundant; adapted for rock-work, hanging baskets, pots, edgings, &c.; ½ foot.......................... 15

HELIANTHUS (SUN FLOWER).

annuus—(RUSSIAN GIANT), single, New Mammoth Russian, a very tall single growing variety, often 15 to 20 feet high; stalks sometimes used for fuel.......................... 5
HELIANTHUS—continued.

annuus "Oscar Wilde"—A Novelty; dwarf, of pyramidal form; desirable for bedding purposes, or for growing singly, or in masses; flowers are small and consist of a jet black center surrounded by a row of bright golden petals overlapping each other and are produced in the greatest profusion; effective as a coccose flower........... 10

tagrophyllus—Double yellow, leaves silky white; ornamental, 5 feet

California ens fl. pleno—Extra large and double; from California; 5 feet

globosus fistulosus, fl. pl.—Finest of all; flowers large, globular formed and of a rich saffron color; 6 feet

Green centered—Yellow, very double with a conspicuous green center

nanus folis variegatis—Very ornamental, with splendid green and yellow variegated foliage. This Novelty is bushy and pyramidal in form. Effective in groups or as single plants on lawns; 4 feet

The HELIANTHUS (Sunflower), old single is well known; but the Dwarf Double varieties are not so common. The large double and single are interesting plants, and the Dwarf Double are very showy.

HIBISCUS—Annual varieties, mixed; highly ornamental, showy, half hardy annuals of spreading habit; flowers large and of many beautiful colors; 2 feet... 5

ICE PLANT—(mesembryanthemum crystallinum), a singular plant of spreading or trailing habit, suited to cover banks or rockeries and for beds, 1 foot

KAULFUA—Bright red, white, rose red centered, brilliant violet, &c., mixed; blooms freely; beds, groups, &c.; 8 inches...

LAVATERA—Rose, white, sulphur colored and purple, mixed; profuse-flowering annuals; desirable for edgings, &c.; 10 inches

LEPTOSIPHON—All colors mixed, including French Hybrids, which are fine; a charming genus of dwarf, half hardy annuals of slightly spreading habit; flowers small and pretty; foliage fine and beautiful; beds, edgings, rock work, &c.; 1 foot...

LIMNANTHES—Elegant and slightly fragrant flowers; excellent for beds and edgings; yellow, white, rose, sulphur, &c., mixed; 8 inches...

LINUM—Splendid red, rose, yellow and white, mixed; free-flowering, showy slender hardy annuals; beds, &c.; 1½ feet...

LOBELIA—continued.

erinus 'hybrida grandiflora'—Fine; large dark blue flower with white eye.................. 10

" Pearl—White with blue eye; fine.................. 15

" FINE MIXED for beds, vases, baskets, &c. 10

For Lobelia cardinalis, &c., look under head of Biennials and Perennials.

The Lobelia is an elegant and useful genus of dwarf hardy annuals; height 8 to 10 inches; well adapted for rock work, beds, borders, vases, baskets, &c.

LUPINUS (LUPIN).

affinis—Blue, white, and purple, delicate colors mixed; 1 ft. 5

albo coccineus—Rich rosy red, apex pure white; 15 inches 5

nanus—Blue, lilac shaded, and pure white, mixed; 1 foot 5

pubescens elegant—Purple, violet and white; ½ feet 5

subcarnosus—Ultramarine blue, crimson and purple; richest of colors; 15 inches............. 5

sulphureus superbus—(Menziesi), yellow, fine, 10

The above varieties mixed being all of the same dwarf, fish and spreading habit; foliage fine and colors pure and delicate.

Cruikshankii—Blue, white and yellow; 3 feet 5

Dunnetti atrovioleolae—Violet, brown and yellow; and Dunnetti superbus, delicate and brilliant colors; pretty; separate or mixed; 3 feet

Hartwegi—Blue, white, light blue, rose and red, mixed; 3 ft.

hirsaetus—Large, white, large blue and large rose, mixed; 3 ft.

hybridus atroviolaceus—Spikes large, beautiful crimson and scarlet, white tip; insignis, dark red; nigrescens, dark; and roses, delicate rose; these 4 beautiful varieties mixed; 3 feet

mutabilis—Changeable colors, roseus and variicolor, mixed; 3 feet

All the above 6 classes (being about the same height and habit); mixed 5

LUPINS are admired for their large spikes of bloom, and the pure and delicate colors of their pea-shaped flowers. The tall growing varieties are exceedingly desirable for mixed flower and shrubbery borders, and the dwarfer sorts are useful bedding plants; fine for bouquets, &c.

LYCHNI.

chaledonica—Bright scarlet; ALBA, white; CARNEA, flesh-colored, mixed; 2 feet

fulgens—Very brilliant scarlet; ½ feet

Haageana—(Benary Improved) scarlet; very fine; 15 inches

fons acropurpureus—Dark purple, fine; 1 foot

" grandiflora gigantea—Flowers very large and of scarlet color; 3 feet

" hybrid—Fine mixed varieties; flowers large; 1 ft.

" nana—(Dwarf), white, red and flesh-colored, mixed; 8 inches

seno striata—A superb and finely striped variety; 1 ft.

Sieboldii—New variety, rare; flowers large, white, fine

viscaria splendens—(Coccinea); deep scarlet; 1 foot

The flowers of LYCHNIS are produced in clusters—are extremely brilliant and showy; plants continue in bloom throughout the summer. Hardy perennials. To obtain flowers first season from seed, sow early under glass and put out plants as early in spring as the soil can be worked. Splendid for beds and borders.
MIGNONETTE SWEET, (Reseda adorata.)
(Continued.)

grandiflora amelloata—Noted for luxuriant growth, sweet fragrance, long massive spikes densely set with large flowers of bright red appearance; per oz. 25 cts. 15

"Golden Queen"—A splendid novelty, producing a mass of powerfully fragrant golden yellow flowers, 20

New Giant—A novelty of robust habit, flowers large and abundant, crimson colored and of exquisite fragrance. 10

Dwarf Compact—A distinct, dense semi-globular variety 10 inches in height, 18 inches across, and composed of innumerable close spikes of fragrant reddish-tinted flowers, continuing in bloom longer than any other sort; evergreen, 10

Pyramidal Bouquet—A dense pyramidal plant, its numerous branches being terminated by large spikes of intense red flowers, 300 of them having been produced on one full grown specimen; fine for pot culture and border. 10

Miles New Hybrid Spiral—A distinct robust grower and a profuse bloomer; spikes 8 to 12 inches long and very fragrant; border or pot culture. 10

Victoria—New Variety, blossoms dark red and very bright, a most valuable and attractive sort. 10

Parsons' New White—The originator says of it: "Pure white, superior in odor, habit and color to other varieties, spikes large and beautifully shaped." 5

The Prize Taker—"Blooms twice the size of the ordinary, very close and dense, of beautiful color and deliciously fragrant." 10

Mignonette is indispensable to the flower garden, and should be ordered with every collection of flower seeds. We offer a full list of varieties. The seed is of the purest and best quality. Mignonette is very desirable for bouquet making on account of its handsome flowers and delicious fragrance; about 1 foot in height.

MIMULUS (Monkey Flower).

moschatulus, (Musk Plant)—A plant with small yellow flowers of musk odor; good for hanging baskets, vases, &c.; 9 inches. 10

tigrinus—Tigred and spotted varieties mixed, remarkably fine; 1 foot. 10

"duplex—(Hose in Hose); double tube; beautiful double tigred and spotted varieties mixed, constant; 1 foot. 20

grandiflorus—Very large-flowering new tigred and spotted varieties mixed. They surpass in beauty anything that has been offered up till now in this genus; 1 foot. 20

Queen's Prize—Large-flowering mixed, fine. 20

The Mimulus comprises numerous varieties of extremely handsome profuse-flowering little plants, with singularly shaped and brilliantly colored flowers. The spotted varieties are very fine.
MYOSOTIS (Forget-me-not.)

</tr>
</tbody>
</table>

The foregoing small-flowering section are profuse bloomers and are admirable for bedding or pot culture.

Petunia, Large Flowering Section.

The German grower from whom we import our Petunia seed says: "The Large-flowering Petunias constitute one of the principal specialties of my establishment; upwards of 30,000 plants were grown on stages for the purpose of artificial fecundation, and it is only seed thereby obtained which is offered. My strains of the following varieties of the section are unsurpassed.

grandiflora alba - Large, pure white, extra | | 25 |
| kermesina - Large crimson, fine | | 25 |
| intus alba - Large, crimson, white throat, extra | | 25 |
| maculata - (Inimitable), blotched and striped varieties, very beautiful | | 25 |
| marginata - Fine large flowers, green bordered and veined | | 25 |
| maculata - Green bordered blotched varieties, fine | | 25 |
| Prince of Wurtemburg - Rosy pink, new. Packet of 40 seeds | | 25 |
Petunia, Large Flowering Section.
(continued.)

grandiflora, Princess of Wurtemberg— Purple, new. Packet of 40 seeds............ 25
20 seeds of each of the last two varieties, separate, in tissue bags, in one packet ....... 25
The last two magnificent varieties produce splendid flowers of extra large size, the very deep throat of which is beautifully veined to the base.

grandiflora purpurea—Fine dark variety, splendid...

Petunia hybrida grandiflora.

Fringed Section.

"Seeds obtained exclusively from the flowers of stage pot plants artificially fecundated."

grandiflora Fimbriata alba—Fringed white, extra...... 25
" " kermesina—Fringed crimson, very fine ... .......................... 25
" " maculata—Fringed blotched and striped varieties, extra .... 25
" " venosa—Veined varieties, fringed edges, charming... 25
" Above fringed varieties in splendid mixture. ......................... 25

The foregoing single fringed petalled Petunias are very pretty and deserving of general attention. The seed is from the finest flowers, and is purchased of the German grower by count and not by weight. This is the ease with most of the grandiflora varieties and all of the following doubles.

Petunia, Double Flowering Section.

Double Striped and Blotted, (Double Invincible)—splendid mixed, producing about 25 per cent. of handsome double flowers. Packet of 50 seeds ............... 25

Double Large-flowering, (Grandiflora flore pleno)—Fecundated with scrupulous care, extra fine, 40 seeds .................. 50

Double Large-flowering Green-bordered, (Grandiflora marginata flore pleno)—Extra fine; packet of 25 seeds ................. 50

Double Large-flowering Robust-growing, (Grandiflora robusta flore pleno)—Splendid variety of semi-dwarf, robust, and compact growth. Packet of 25 seeds. ................. 50

Double Fringed, (Grandiflora Fimbriata), mixed; Benary’s Strain. This seed will produce from 25 to 30 per cent. of plants with charming double fringed flowers. Packet of 30 seeds .......... 50

The difference in the quality of Petunia seed is very great. That saved from out door plants is very much inferior to that from shelf pot plants. For pot plants and artificial fecundation only the finer sorts are selected. There is more pleasure derived from producing one fine specimen than there is from the growth of a hundred inferior plants. Our seed can be relied on as being the best that can be had.

The Petunia is a much admired fragrant hardy annual of easy culture continuing in bloom from early in summer until after light frosts. The profusion of flowers of various forms, with their great variety of splendid colors and their long duration in bloom, places the Petunia class of plants among the most desirable for bedding grouping and as single specimens.

PHLOX DRUMMONDI.

VARIETIES OF THE OLD SECTION.

There is no flowering plant that gives greater satisfaction than Phlox Drummondii. Its ease of culture: its habit of growth; its great variety of splendid colors; its long duration in bloom; its usefulness for bouquets, ribbon gardening and bedding, make it a favorite with all.

alba—Pure white, fine........................................... 10

Varieties mixed—Packet of 10 seeds...

Phlox Heynholdi varieties are not adapted for the open ground. They should be grown and allowed to bloom in small pots. Properly cared for they are beautiful, free and long flowering plants.

Craf Gero Section Phlox Drummondi.

PHLOX DRUMMONDI GRAF GERO.

All of the Graf Gero Varieties — White, rose, rose marbled, violet, &c., MIXED; packet of 20 seeds...

Phlox GRAF GERO varieties are all well adapted for pot culture. They produce a mass of flowers of various fine colors.

The foregoing list of Phlox Drummondi is the largest and most complete every published in this country. It comprises every desirable variety of each section. It includes several Novelties — new varieties of great merit. The Phlox Drummondi is a most delightful class of flowering plants. The size and habit of the plants, and the many distinct and brilliant colors of their flowers, make them the most desirable of all other annuals for ribbon gardening, and they are not excelled for clumps, masses, beds, or for cutting for bouquets.

Platystemon Californicum — A pretty, free-flowering hardy annual of spreading habit, with fragrant yellow flowers; beds, baskets, or edgings; 1 foot.

Podolepis — Yellow, pink, &c., mixed; pretty, free-blooming plants of graceful habit; beds or mixed borders, 1 foot.

POPPY, (PAPAVER).

Murselli, fl. pl. — Double white and double red mixed, fine

Itheas fl. pl. — Double Ranunculus, mixed; flowers splendidly fringed

umbrosum — New; flowers rich glowing vermilion with a deep shining black spot on each petal; showiest of the species
POPPY, (PAPAVER)—Continued.

Carnation, Double—12 varieties, mixed; flowers lacinated, fine........... 5
Peony-flowered Dwarf—Very double; all colors mixed, fine................. 5
Dwarf Runcianus—flowering, all colors showy............................... 5
Papaver somniferum—True white-seeded single Opium Poppy; per oz., 15 cts. 5

The foregoing varieties of the PAPPA ARE FREE-FLOWERING and the most showy of the kinds that bloom the first season from seed; flowers are large and of the most brilliant colors; height about 2 feet.

PORTULACCA.

Single—White; White-striped; Deep golden; Yellow-striped; Rose, striped with Carmine; delicate Rose; Rich Crimson; Fine Crimson. All these colors mixed.................. 5

Double rose-flowered—White; Yellow; Golden-striped; Rose, striped with Carmine; delicate Rose; Red; Purple; Sulphur-colored; fine Crimson. These colors in separate packets, each packet.................. 5

Our own mixture of the above, in one packet, a few seeds of each............ 20

DOUBLE ROSE-FLOWERED IMPORTED, MIXED.............................. 10

The PORTULACA is a creeping hardy annual, the flowers of which are remarkable for brilliancy, richness and variety of color, particularly appropriate for beds, clumps, edgings, pots, vases and rockeries.

RICINUS (CASTOR OIL BEAN).

Africanus hybridus—Fruit and stalk rose-colored; 8 feet........ 5
Borbonicus arboreus—Of noble aspect, leaves very large; 15 feet.................. 5
coechleatus—Leaves and fruits blue-green; 8 feet................... 5
Gibbosi, (Duchess of Edinburgh)—With dark purple stem and leaves very ornamental; 5 feet.................. 5
giganteus glaucus—Immense bluish green leaves; 15 feet........ 5
Guyanensis nanus—Dwarf, rose fruits; 2 to 3 feet.................. 5
Sanguineus crispul—New, fine, blood-red stalks and large crispul leaves; 5 feet........ 5
Communis, (Palma Christi)—Common Castor Oil Bean; per lb. 50 cts., oz. 10c........ 5
TALL VARIETIES MIXED...................................................... 5
DWARF ................................................................. 5

The varieties of RICINUS are rapid growing tropical plants of majestic aspect, leaves very large, glossy, and of various shades of color; foliage and fruit very ornamental. Fine for lawns or any place where large ornamental plants are required.

SALPICOGLOSSIS.

Variabilis—White and Yellow; Red; Blue; new Scarlet; Black; Rose, Yellow, and Veined; mixed; 2 feet........ 5

grandiflora—White and Yellow; Scarlet; Purple; Rose; Sulphur and Violet, mixed.................. 10

The GRANDIFLORAS are new, extra fine, large-flowering varieties.

nana—(Dwarf), White and Yellow; Dark Violet; Blue; Scarlet; nigra, Black; Rose; Sulphur and Veined; mixed.................. 10

The SALPICOGLOSSIS have richly colored, delicately veined and motiled blossoms of a rich velvety softness; fine for beds, bouquets, &c.

SANVITALIA PROCUMBENS fl. pl.—

Double, fine golden yellow; a plant of low creeping habit, producing in great abundance very pretty, double bright yellow flowers........................................ 10

SCABIOSA.

All Tall Double Varieties mixed........................................ 5
All Dwarf ............................................................... 3

SCABIOSA is noted for an abundance of flowers of a great diversity of beautiful colors; excellent for bouquets and other ornaments.

SCHIZOPETALUM WALKERI—An interesting plant, with white-fringed, very sweet-scented flowers; 10 inches................................. 5

SCHIZANTHUS—Orange and lilac; rich Crimson, black eye; variously colored blue centered; lilac; deep rose tipped with orange and crimson; &c., mixed; elegant, half-hardy annuals; 1 foot.......................... 5

SEDUM COERULEUM, (STONE CROP)—A useful blue-flowered little plant, growing freely on rock or rustic work, mounds, walls; &c.; 1 inches........ 5

SENSITIVE PLANT, (MIMOSA PUDICA)—A tender annual, grown rather as a curiosity; the leaves shrivel and fall on being slightly touched.................. 5

SOLANUM.

capiscastrum, (JERUSALEM CHERRY)—About 1 foot in height and covered through the winter with a profusion of cherry shaped fruit........................................ 10
ciliatum—A bush 20 inches in height, bearing brilliant scarlet plum-shaped fruit an inch in diameter, retaining its color and remaining on the plant a long time........ 10
Hendersoni—Exceedingly pretty; bears numerous sliding orange scarlet pear-shaped berries; 3 feet........ 10
hybridum Tomentosum—A plant of neat bushy habit, 15 inches in height, thickly covered with small orange scarlet berries. A SPLENDID plant for winter decoration ........ 10
pekinese nigrum—Black Egg Plant from Peking; small fruit; suitable for pot culture.................. 10
Pseudo capiscastrum naunus—Covered with a profusion of miniature pepper-shaped scarlet fruit; 1 foot........ 10

Weatherills hybrids—Plants about 20 inches in height, foliage dark green; crimson orange-shaded berries in great profusion; splendid for pot plants........ 10
Warscewiczoides—A magnificent plant with immense lobed leaves of a dark green color; fruit ornamental; height 6 to 8 feet, and when planted in masses produces a grand effect.......................... 10

The SOLANUMS are particularly ornamental, both in foliage and fruit. They make very handsome pot plants for the decoration of the greenhouse, conservatory or sitting room; fine for groups on lawns, or as single specimens. Seed should be sown early in April. Transplant as soon as large enough. Keep plants properly watered and by fall they will be covered with an abundance of fruit.

SPHENOCYNE speciosa—Free-flowering hardy annuals of spreading habit; flowers yellow; fine for beds, mixed borders and edgings; 1 foot........ 5
SPRAGUEA umbellata — Plant of singular habit, very spreading; flowers stems naked, thick and fleshy; extend about 18 inches either way with a cluster of small pink flowers at the end of each; good for rockwork.......................... 20

STOCK, Ten Weeks.

Double Dwarf German—Fine dwarf; colors bright; free bloomer; 24 fine named varieties mixed; 15 inches........................ 10
Double Dwarf German Bouquet—Fine for beds, edgings, &c.; 10 varieties mixed.......................... 10
Largest-flowering Dwarf—Very large spikes of magnificent large double flowers; 20 splendid named varieties mixed; 15 inches......................... 15
Largest-flowering pyramidal—Flower spikes very large, double and showy; 8 fine named varieties mixed; 15 in., 15
Largest-flowering Dwarf pyramidal—Extra; extra double; splendid race; flower spikes extra large; 8 beautiful varieties mixed; 15 inches.......................... 20
New Tree or Giant—Very fine and double; 8 varieties mixed; 2 feet........................................... 20
New Giant Perfection Ten-week—A new introduction; a splendid race of pyramidal growth, with long spikes of beautiful large double flowers. Height 2½ feet; finest for open ground. Following splendid colors mixed: Brilliant crimson, Red Brown, Dark blue, Flesh color, Rosy red, White, Copper red.......................... 25
Wall-flower-leaved Dwarf German—The fresh shining green foliage, and the brilliant colored flowers of this section make it deserving of general cultivation. 12 beautiful varieties mixed; 2 feet........................................... 15
Swarm German Ten-week—Mixed........................................... 5
Sage-flowering Dwarf German Ten-week—Mixed. ........................................... 10

The Ten Week or annuals Stocks are a popular class of flowering plants. Our list embraces all the Leading and best varieties. The Seed is German grown and saved from the best for plants only. Every flower garden should have a good representation of these profuse, long blooming sweet-scented favorites.

VERBENA—continued.

hybrida coecina—Scarlet, different shades.............................. 15
" coerulescens—Beautiful blue shades.............................. 15
" Defiance—The splendid old scarlet bedding variety; extra fine........................................... 20
" lutea—Yellow, new, novel.............................. 40
" maxima perfecta alba—Large, pure white; fine for florists........................................... 20
" striata—Striped like the Italian Carnation; seed saved from a rich collection........................................... 20

Montana—Hardy perennial from the Rocky Mountains; blooms profusely the first season from seed; flowers rosy red and as fragrant as the Carnation.......................... 15

The Verbena is one of the most popular of bedding plants. May be used for any purpose where dwarf plants are required. For separate beds, ribbon borders, clumps, hanging baskets, vases, &c., it is fitted to perfection. The Verbena continues in bloom a long time.

WHITLAVIA grandiflora—Blue, white, &c., mixed; free-blooming plants, with small fine foliage and beautiful bell-shaped flowers; groups or masses; 1 ft........................................... 5

ZINNIA ELEGANS.

Extra Fine Double from Selected Flowers.

alba flore pleno—Double white; 2 feet........................................... 10
atropurpurea fl. pleno—Double dark purple; 2 feet........................................... 10
aurata flore pleno—Golden yellow, fine double; 2 feet........................................... 10
carnosa flore pleno—Double flesh-colored; 2 feet........................................... 20
coccinea flore pleno—Fine double scarlet; 2 feet........................................... 10
kermesina flore pleno—Crimson, double; 2 feet........................................... 10
lilacina flore pleno—Double lilac; 2 feet........................................... 10
purpurea flore pleno—Double purple; 2 feet........................................... 10
sulphurea flore pleno—Double bright sulphur-colored; 2 ft........................................... 10

Above mixed, a few seeds of each kind in each packet........................................... 10

DOUBLE ZINNIA ELEGANS, MIXED AS IMPORTED........................................... 5

The following Dwarf Class of Double Zinna elegans is highly recommended:

elegans pumila alba flore pleno—White, NEW, splendid; 1 foot........................................... 15
" " aurea flore pleno—Dwarf golden; 1 foot........................................... 15
" " coccinea fl. pl.—Dwarf scarlet; 1 foot........................................... 15
" " kermesina fl. pl.—Dwarf crimson; 1 foot........................................... 15
" " purpurea fl. pl.—Dwarf purple; 1 foot........................................... 15
" " sulphurea fl. pl.—Dwarf sulphur; 1 foot........................................... 15

ZINNIA ELEGANS.
Zinnia Elegans, Dwarf—Continued. PER PKT. CTS.
elegans punilla violacea fl. pleno—Dwarf violet; 1 foot, 15 " " MIXED, a few seeds of each of the foregoing punilla varieties in each packet... 15 MIXED AS IMPORTED......................... 10

The ZINNIAS are robust spreading plants of easy culture, producing in abundance bright colored perfectly double flowers as large as the miniature Bouquet Dahlia; height of the Tall about 2 feet, and the Dwarf 1 foot. All make fine bedding plants.

Zinnia Haageana.

Haageana flore pleno—Double-flowered, FIRST QUALITY, saved only from the most perfect flowers. Flowers small, rosette-shaped and of deep orange color, keeping larger and larger with the cooler weather. Good bedding plant; 2 feet......................... 15

Haageana—flore pleno—Double-flowered, 2d quality..... 10

Zinnia, Darwini Section. PER PKT. CTS.
Darwini nana compacta—"Compact, densely branched bush, with neat foliage and covered with multitudes of singularly beautiful flowers, imbricately double, and in conical form; 15 inches; 12 DISTINCT COLORS MIXED." 15 " major—"Plants and flowers larger than the above; flowers globular in form and very double; 12 SELECTED COLORS MIXED; 20 inches".......... 15 " pyramidalis—"Plants pyramidal; flowers conical in shape and imbricately double; 12 DISTINCT COLORS MIXED".................. 15 " vittata—Carnation-striped and exquisitely and beautifully striped as the finest Carnations; 6 FINE STRIPED VARIETIES, MIXED; 20 inches... 15 ABOVE FOUR CLASSES, MIXED ....................... 15

The DARWINI Section of DOUBLE ZINNIAS is an entirely distinct strain; named in honor of the great evolutionist Darwini. They come into flower early and continue in bloom until frosts.

ORNAMENTAL CLIMBING PLANTS.

The great diversity of habit, foliage and flowers of CLIMBING PLANTS fits them for a variety of objects; some make slow, others rapid growth; some are of coarse habit and large foliage, others of slender growth, with finely cut leaves and splendid flowers—all useful and even beautiful, when filling their appropriate places. The fine delicate varieties are particularly desirable for hanging baskets, cases, &c. The strong and vigorous growing are useful for covering Arbors, Verandas, Balconies, Fences, and other fixtures.

ADLUMIA cirrhosa—“Mountain Fringe,” “Alleghany Vine;” hardy biennial; a beautiful climber; foliage pale green, flowers small, pink and white, and abundant during 3 months of the second season; 15 ft., 10

AMPELOPSIS.
quinquefolia—"Virginia Creeper," "Woodbine," a rapid, vigorous growing native vine, with deeply lobed leaves, which change in autumn to deepest crimson. A beautiful climber for porches and verandahs. Perfectly hardy; hard-wooded ............ 10

Veitchii—A variety from Japan, much grown in and about Boston, where it is called by many “Boston Climber,” “Boston Joy.” It is the most elegant and unique of all the climbers, perfectly adhering to wood and brick, painted or unpainted, stone, rough granite, &c. Planted near the foundation wall of a house it will grow and spread out fan-like and cover almost any required space with a mass of deep colored beautiful foliage. PERFECTLY HARDY; seeds per packet........... 15 GOOD STRONG PLANTS, pre-paid by mail, each........ 25

ARISTOLOCHIA Sipho, (Dutchman’s Pipe)—A rapid growing plant with large heart-shaped foliage, and curious, large rich purple flowers resembling a pipe; hardy perennial; 30 feet.......................... 10

BALOON Vine, (CARDIOSPERMUM)—A half hardy annual, called “Love-in-a-Puff” on account of its curious, inflated, singular appearance; 10 feet........ 10

Good strong plants, PRE-PAID, BY MAIL............. 50

BELVIDERE, (SUMMER CYPRESS)—A highly ornamental and graceful cypress-like plant, a rapid grower, admirably adapted for the decoration of cemeteries; 4 ft. 5

BIGNONIA, (TRUMPET VINE)—One of the most ornamental and desirable of climbers for covering walls, houses, verandas, &c., flowers trumpet shaped, brilliant scarlet, literally covering the vines; 30 feet........ 10

CALAMPELIS scaber—One of the best of climbers; flowers bright orange yellow, in racemes; tender perennial; blossoms first season; start early; 10 feet.... 10

CANARY Bird Flower—See TROPAEOLUM MAJUS.

CLEMATIS,
cirrhosa—A fine climber, producing white fragrant flowers in profusion; 15 feet.......................... 10
coccinea—A very fine new variety, an abundant bloomer; flowers scarlet; 30 feet.................... 20

Flamula, (SWEET VIRGIN’S BOWER)—European Sweet; a vigorous climber; flowers small, in beautiful clusters, and very fragrant; 15 feet....................... 10
CLEMATIS continued. PER PKT. CTS.

**graceolens** - A *luxuriant* grower; flowers yellow and about 2 inches in diameter, followed by seeds that are covered with tufts of beautiful silk-like threads; fine... 15

**hybrida grandiflora mixed** - Handsome large-flowering varieties of beautiful colors 20

**Jackmanni hybrida** - An English hybrid; one of the finest of *Clematis*; flowers intense purple, about 5 inches in diameter and produced in the greatest profusion, completely covering the plants; 10 feet... 25

**Lamunigosa candida** - A profuse large white-flowering variety; flowers about 5 inches in diameter and abundant; 10 feet... 20

**patens** - *Azara grandiflora*; *floribunda*; *Helena*; *Sophie*; *Sophie fl. pleuro*; *MIXED* 20

**Pitcher** - *NEW*; a plant of elegant habit and foliage; blossoms *bright red*; hardy climber; 10 feet... 20

**Verticillata** - In bloom from June to September; flowers blue and bell-shaped; grows 8 to 10 ft. in a season; fine, 10

**Virginiana, (Virgin's Bower)** - A rapid climber, with clusters of small white flowers succeeded in Autumn by fruit with conspicuous long fleshy tails. The root is *perennials*; plants make growth of 30 feet in a season, 10

**Vitalba, (Traveler's Joy)** - A *vigorons*, rapid grower with clusters of fragrant small white flowers... 10

**Virgicella** - Flowers purple; fine; 20 feet... 10

COBÆA.

**Scandens** - Flowers large, purple, and bell-shaped. 10

**flore albo** - Flowers white 25

The *Cobœa* is a rapid growing fine foliaged climber with very showy flowers, 20 feet.

CELASTRUS scandens, (CLIMBING BITTER SWEET)

A *handsome* native climber, producing small yellow flowers early in the season, followed by very ornamental orange colored berries; 30 feet... 10

CONVOLVULUS MAJOR, (MORNING GLORY.)

**White** 5

**White**-Striped with blue 5

**White**-Striped with violet 5

**Tricolor**-Three colored 5

**Rose** 5

**Carmine** 5

**Incarnata** - Bright red 5

**Dark Red** - Atroanguinea 5

**Lilac** 5

**Black Blue** 5

**Dark Blue** 5

**Michauxii** - Beautifully striped 5

Above *Convolvulus* in *Splendid Mixture*... 5

*Convolvulus aureus superbus* - *Splendid golden yellow*; *Novelty of 1883.* 10

*Convolvulus euthebus stellatus*- Starry, for pots, vases, &c... 10

**Cupaniana** 5

The *Convolvulus Major* is universally known as the *Morning Glory*. It is a rapid grower and very desirable for covering arbors, verandahs, &c. Its flowers are very large and showy, and of the most delicate and pleasing colors.

CYPRESS VINE (IPOMAEA QUAMOCLIT). PER PKT. CTS.

**Scarlet** 5

**White** 5

**Rose** 5

**Above three varieties mixed** 5

CYPRESS VINE (HEDERAESIFOLIA) - A *NEW Ivy-leaved* variety. It is a rapid growing climber, and bears its *fine scarlet* flowers in abundance. 10

DOLICHOS.

**Dolichos Lablab** (HYACINTH BEAN) - A fine climber; flowers white, purple and lilac; 12 feet... 5

**abrus nanus** - Dwarf, white flowers; 12 feet... 5

**giganteus** (SPEC. FROM TEXAS) - Strong grower with purple flowers; 12 feet... 10

The *Dolichos* is a genus of rapid growing and useful twiners, known as the *Ivy-bean*. The plants are quite ornamental when in bloom, and the flowers are succeeded by *shiny*, *shining* seed pods, which add to their otherwise fine appearance.

GOURDS and OTHER ORNAMENTAL FRUIT BEARING CLIMBERS.

**Abrobra viridilloda** - A *handsome* climber with finely cut glossy green foliage and small scarlet fruit; 6 feet... 10

**Benincasa hispida** - *Ornamental* black wax-like gourds; 6 ft... 15

**Bryonopsis lactuosa** (ERYRTHROPAPA) - Extremely ornamental, with splendid scarlet fruit; edged with white; 5 feet... 10

**cocinea indicia** - *A splendid climber, with elegant foliage and fine scarlet fruit*; 6 feet... 10

**Cucumis dipsacens** - *Tassel shaped* yellow fruit; elegant; 9 ft... 5

**crinacens** - Fruit covered with spines or prickles 5

**flexuosus** (SINICA CUCUMBER) - *Fruit long and snake-like*; grown as a curiosity; 1 foot... 5

**grosularioidea** - Gooseberry-like small fine green fruit; 5 feet... 5

**ordoracissimus** - A curious plant; rapid grower; 5 feet... 5

**perennis** - Foliage ornamental, fine; 15 feet... 10

**Species from Zanzibar; NEW; fine**... 20

**Cucurbita argyrosperma** - Fruit large, mottled and finely striped... 5

**Lagenaria cucurbita** (Bottle Gourd) - Fruit large and shaped like a bottle; 15 feet... 5

**leuca molecule** - Large flattened gourd; 15 ft... 5

**longissima** - Long, curious fruit; 15 ft... 5

*CYCLANTHERA exploda* - A free-flowering plant of the gourd species, with *handsome foliage* and oval shaped fruits, exploding with a loud noise when ripe; 10 feet... 10

**Lagenaria siphon** - *Siphon Gourd*... 10

**Momordica Balsamia** - A trailer with very handsome foliage and orange and red fruit; 10 feet... 5

**Charantia** (BALSAM PEAR) - Long, pear-shaped fruit; 10 feet... 5

**Elaterium** - *A Very ornamental Gourd*... 10

**Trichosanthes coccinii** - *Sarlet fruited*... 10

**colubrina** - True *Serpent Gourd*; fruit from 3 to 4 feet long, shaped like a serpent... 10

**palatana** - A fine foliaged variety... 10
GOURDS, &c. continued.

Mukia scabrella—10 feet.......................... 10
Eopeon—An interesting plant of the Gourd species...... 20

All the following are Ornamental Gourds:

Angora, BLACK SEEDED—White spotted foliage, very useful
for arbors ........................................... 5
Bishop's mitre, ORANGE—An interesting form of Gourd...
Clava Hercules, (HERCULES CLUB)—Large fruit, shaped
like a club; 15 feet .................................. 5

The following are MIXED LARGE ORNAMENTAL GOURDS:

Apple-formed—3 sorts, separate or mixed, striped apple,
&c., very ornamental.................................. 5
Lemon-shaped—A very pretty little yellow fruit .................. 5
Pear-shaped—Green, white striped, &c.; very handsome .... 5
Egg-shaped—Resembling an egg in shape and color .................. 5

Other sorts of LARGE FRUITED GOURDS, each...................... 5

Small FRUITED ornamental sorts as follows:

Apple-formed—3 sorts, separate or mixed, striped apple,
&c., very ornamental.................................. 5
Lemon-shaped—A very pretty little yellow fruit .................. 5
Pear-shaped—Green, white striped, &c.; very handsome .... 5
Egg-shaped—Resembling an egg in shape and color .................. 5

Other sorts of LARGE FRUITED GOURDS, each...................... 5

FINE MIXED LARGE ORNAMENTAL SORTS

SMALL FRUITED ornamental sorts as follows:

Apple-formed—3 sorts, separate or mixed, striped apple,
&c., very ornamental.................................. 5
Lemon-shaped—A very pretty little yellow fruit .................. 5
Pear-shaped—Green, white striped, &c.; very handsome .... 5
Egg-shaped—Resembling an egg in shape and color .................. 5

Other sorts of LARGE FRUITED GOURDS, each...................... 5

GROSSULARIA—Gooseberry-like, small, fine green fruit ............ 5

The Gourds are an interesting class of climbers on account of
their curiously shaped and ornamental fruits, large foliage and rapid growth. The finer growing
sorts, owing to their splendid foliage and handsome fruit, are desirable for covering lattice work or other
fixtures where elegant plants are required. The larger varieties are good for covering unsightly objects where
quick results are desirable.

IPOMOEA—continued.

hederacea grandiflora folia marmorata—Mixed colors, leaves silver-striped; fine; 10 feet........ 5
limbata—Large, handsome flowers, violet margined with
white; 5 feet........................................ 5
elegansissima—A splendid variety, with rich blue
flowers, white margined; 6 feet.................... 20

The Ipomoea comprises a class of tender annuals,
with splendid, large bright-colored and elegant flowers.
Very superior and fine climbing plants. Similar to the
Morning Glory in habit but rather more tender.

LOPHOSPERMUM.

coccineum—Flowers scarlet, fine; 10 feet......................... 10
scandens—Rosy purple; a fine trellis plant; 10 feet........... 10

The Lophospermum are extremely handsome climbers,
suitable for baskets, vases, rock-work, &c.; produces
showy, fox glove-shaped flowers.

MAURANDIA.

albiflora—A beautiful pure white flowered variety; 10 feet 20
Barclayana—Rich violet, fine; 10 feet.......................... 10
Emeryana rosea—Beautiful rose; 10 feet.......................... 10
purpurea grandiflora—Large-flowering purple variety; 10 ft. 10

The Maurandia as a superb climber cannot be too
highly recommended. The plants are of very graceful
habit, elegant in appearance and abundant bloomers.
Very desirable for baskets, vases, &c.

NASTURTUM TALL.

(Tropaeolum major.)

major atropurpureum—Dark crimson.................. 5
coccineum—Bright scarlet.................. 5
Dunnett's Orange—Dark orange.................. 5
hemisphaerium—Very handsome, bright
orange.................................................. 5

King Theodore—A new variety, having
bluish green foliage and almost black flowers........ 5

The varieties of Tropaeolum major, or Tall Nas-
turtium, are very useful and much admired climbers.
The plants are of rapid growth and the flowers are
bright and attractive; height from 6 to 8 feet; suitable
for baskets, vases, rock-work, &c.
NASTURTIUM TALL.
(TROPAEOLUM LOBIANUM.)

| " intus alba—Buff, with white eye |                        | 5              | 0.25          |

FINE MIXED .................................................. 5

The Thunbergias are a class of attractive, tender annuals. All the varieties are free-bloomers of twining habit, growing to the height of 4 feet. Fine for baskets, vases, &c.
EVERLASTING FLOWERS.

Those who have not the facilities to grow plants and flowers in their dwellings during the winter months, will find a few of these beautiful flowers very useful, to brighten up their homes during the winter. The flowers of all the given varieties will keep fresh and bright for several seasons. They can be worked up into wreaths, crosses, monograms, baskets, &c., and if necessary can be used for funeral or festive purposes. The flowers should be cut in various stages of growth; some when half opened and others when fully blown. After cutting, tie into small bunches and hang them up in a dry, airy place, with the flowers downwards, to keep their stems straight and in good shape.

</table>

The Brizas are among the most desirable of ornamental grasses for bouquets and other winter ornaments. They are hardy annuals, about 1 foot in height, and very easily grown.
**BRYZOPYRUM siculum**—A dwarf hardy annual, with shining green leaves; fine for edgings, bouquets, &c. 5

**BROMUS.**

*briziformis*—A very desirable Grass, much like *Briza maxima*; 1 foot. 5

*macrostachyus*—Fine grass for mixed borders. 5

*madritensis*—A very fine grass for dyeing. 5

The varieties of BROMUS are hardy, perennial Grasses, and fine for borders, bouquet making, &c.; 1 foot.

**CERATOCHLOA pendula**—Hardy annual, with fine, drooping long spikes of flowers; 1 foot. 5

**CHLORIS.**

*barbata*—Free-bloomer with tassel-Shaped flowers; 1 foot. 5

*elegans*—A slender and elegant Grass; 1 foot. 5

*truncata*—Elegant for bouquets and other winter ornaments; 1½ feet. 5

The CHLORIS varieties of Grasses are hardy annuals, producing an abundance of foliage and beautiful silvery plumes.

**CHrysusRUS cynosuroides**—Hardy annual; very dwarf, with golden feathery spikes; 6 inches. 5

**COIX, (Job's Tears.)**

*chinensis*—A fine variety from China. 5

*Lacryma*—A very desirable and showy variety. 5

The COIX is a tender annual, with broad corn-like leaves, and hard, shining, pearly seeds, resembling falling tears, and which are often perforated, and used by children for beads.

**ELEUSIS.**

*bareinoennis*—A curious looking plant, with stems resembling horns; elegant for pot culture. 5

*corocana*—A very good variety. 5

*indica*—Spreading and graceful. 5

*obligostachya*—Three horns. 5

The ELEUSIS is a curious class of plants, hardy annuals, and about 1 foot in height.

**ELYMUS hystrix**—Hardy perennial; flowers in spikes; useful in bouquet making. 5

**ERAGROSTIS.**

*Abyssinica*—An Abyssinian grass, fine for bouquets; 2 feet. 5

*amabilis*—A most lovely grass for bouquets, &c.; 1 foot. 5

*cylindrillora*—A most graceful grass; 2 feet. 5

*elegans*—(Love Grass)—An elegant and graceful grass; 1 ft. 5

*maxima*—A new *Abyssinian* grass; very decorative; 2 ft. 10

The varieties of ERAGROSTIS are hardy annuals, and are beautiful border plants, and indispensable for bouquets.

**ERIANThUS.**

*Ravenne*—Much like the Pampas Grass, but more graceful, and better suited to Northern climates. The flowers are silvery white and delicately beautiful. 10

**ERIANThUS—continued.**

*Ravenne folia variegatis*—Foliage variegated; fine. 5

*violacea*—Flowers violet tinted; fine. 10

The above are hardy perennial plants with exquisite plumes resembling the Pampas Grass, will flower the first season, if sown early in the hot-bed or greenhouse. Fine for lawns, &c.; height 8 to 10 feet.

**EULALIa japonica**—One of the best of grasses for lawn decoration; hardy perennial; 5 feet. 10

**FESTUCA altissima**—Fine for lawns, bouquets; &c.; hardy perennials; 4 feet. 10

**GYMNOTHRiX.**

*canina*—A splendid ornamental Grass; 4 feet. 10

*japonica*—A beautiful variety from Japan; 6 feet. 10

*latifolia*—A broad leaved variety; very striking; 10 feet. 10

The above are very handsome foliage plants; make a fine show as separate plants on lawns, and especially the latifolia variety; half hardy perennials.

**GYNERIUM.**

*argentum*—A very stately variety, producing long silken silvery plumes of flowers. 5

*roseum*—Similar in habit and appearance to the above, with rose-colored plumes. 10

*variegatum*—Foliage beautifully variegated. 10

The varieties GYNERIUM or PAMPAS GRASS, are half-hardy perennials at the north, hardy at the South, and the most noble grasses in cultivation, producing beautiful plumes on stems 8 to 10 feet high.

**HORDEUM jubatum**—(Squirrel Tail Grass)—Hardy annual with beautiful purplish plumes. 5

**LAGURUS ovatus**—(Hare's Tail Grass)—Hardy annual with pretty ornamental heads of bloom, fine for bouquets, &c.; 1 foot. 5

**LASIACROSTI S argentia**—A very beautiful silvery-white grass, fine for ornamental work and grass bouquets; hardy perennial; 2 feet. 5

**LEPTOCHLOA arabica**—Very pretty hardy annual. 10

**PANICUM.**

*capillare*—A beautiful grass; hardy annual; 2 feet. 5

*Sulcatum*—Palm-formed; one of the most elegant grasses; hardy perennial; 4 feet. 10

*virgatum*—A very showy and hardy perennial grass; 4 feet. 5

Extremely decorative and ornamental Grasses, suitable for bouquets and elegant in borders.

**PASPALUM elegans**—Pretty for borders or shrubberies; hardy annuals; 2 feet. 10

**PENNisetum.**

*cerenoides*—A very graceful grass; 1 foot. 5

*longistylum*—An elegant and interesting grass; 18 inches. 5

The most distinct and beautiful of ornamental grasses, useful for the formation of winter bouquets and other ornaments; hardy annual.
POA amabilis—A most loveable Alysianian grass... 10
SETARIA macrochaeta—An elegant grass, 1½ ft. 10
STIPA pennata, (FEATHER GRASS)—Hardy perennial, flowering second season; one of the most grace-fully beautiful of the grasses, bloom is very delicate and feathery; in great demand for ornamental work and forosets' use 5
TRICHOLAENA rosea—Hardy perennial; a very beautiful rose-tinted grass, flowering the first season from seed; 1½ feet. 10

TRIPSACUM dactyloides—A large, coarse and very singular grass; hardy perennial 5
UNIOLA latifolia—Singularly elegant and showy, and beautiful in bouquets and other decorations; hardy perennial; flowers first season 10
ZEA, (ORNAMENTAL MAIZE).
Caragua—An ornamental variety of Corn; 3 feet 5
gracilima—A miniature ornamental maize; 2 feet 5
japonica folia variegatis, (JAPANESE CORN)—The foliage is evenly striped, and in its early stages of growth is tinted with rose; 3 feet 5

ACANTHUS.
atifolius—A fine ornamental large-leaved variety, with showy white flowers; 3 feet 10
mollis—A showy variety with purple and white flowers; 3 feet 5
spinus—A prickly ornamental-leaved plant with showy purple flowers; 3 feet 10
The varieties of ACANTHUS are strong growing, stately appearing, fine foliage plants with showy flowers in long spikes; hardy perennials 3 feet in height.

ADENOPHORA suaveolens—Hardy perennials with pale blue flowers; flowers freely first season if sown early; 2 feet 10

ADONIS vernalis—Hardy border perennial, growing freely from seeds, with large yellow flowers; 1 foot 5

ALYSSUM.
saxatile compactum—Hardy perennial; a beautiful variety, with deep golden yellow flowers; 1 foot 5
Wierzbech—Flowers white and yellow; protect in winter; 1½ feet 5

The ALYSUMS are free-flowering dwarf border plants, blooming early in spring; flowers are small but quite conspicuous, excellent for rock-work and very suitable for the border.

ANEMONE.
Japonica—Rosy red, flowering till frost; 2 feet 15
" Honorine Jobert—A beautiful variety, with large white flowers; 2 feet 20

ABOVE MIXED 15

These ANEMONES, (not the hulbous), are the very finest free-flowering, hardy border plants that our gardens boast of. The culture is easy, succeeding in any good garden soil.

AQUILEGIA (COLUMBINE).
alba picua—Double white; 2 feet 10
alpina atrocoroniluca and superba mixed—New and fine; 2 ft. 10
Californica hybrida—Large pale yellow flowers, with dark orange spikes; a new variety; 2 feet 20
caryophylloides II. pl.—Double Carnation-striped, white and red; splendid; 2 feet 10
ehrysanthia—Golden yellow; fine; 3 feet 10
coeulea—Flowers are very large, violet blue, the inner petals being pure white; one of the most beautiful of the species; 2 feet 10
hybrida—Large sulphur yellow flowers with palish blue spurs and sepalis; splendid; 2 feet... 15
Durandii pl.—Double variegated, red and white striped; 1½ feet 5
formosa II. pl.—Blue, copper-colored, black and red mixed; all double; fine... 5
landulosa vera—Beautiful, very large erect dark blue flowers tipped with white; 1½ feet 20
olympica—A vigorous grower, flowers rich blue with a white edged lip; 2 feet 10
skinneri—Crimson, scarlet and orange; very handsome species; 1½ feet 10
varvaeneana folia variegatis—Represents its beautiful, variegated foliage exactly from seed; double rose-colored flowers; fine; 2 feet 10
atrovioleacea pleniissima—Splendid novelty, with very double dark-blue flowers and variegated foliage; extra fine 25
DOUBLE VARIETIES MIXED, FINEST AND BEST... 10
SINGLE... 5

The AQUILEGIAS are hardy perennials; they are of the Homestead style of flower; some double and others single and of various colors; an interesting genus of border plants of the easiest culture.

BIENNIALS and PERENNIALS, Flowering Second Season.

Many of the finest and most showy of flowering plants come under this head. Our list is very full and comprises the best and most desirable—mainly Perennials. The Perennials of our assortment are valuable from the fact that they survive the severest winters, without special care, some coming into flower early in spring, and others in summer and autumn. The BIENNIALS and PERENNIALS, whether tender or hardy, will be noticed in the descriptions.

Collection of 16 distinct colors—Saved from Charter's Prize varieties; unequalled $2.00

Noble and majestic-growing, hardy perennials; their flowers are produced in the greatest abundance of almost every shade and tint, and are in shape and appearance, like beautiful and chaste rosettes; can be used to advantage in making large floral pieces, and should be largely grown. To perpetuate fine varieties divide the roots after blooming and for new kinds sow seed every year. Height of the above improved varieties of the Hollyhock 4 to 5 feet.

### HONESTY—Purple and white, separate or mixed, hardy biennials producing handsome silvery and purple seed pods; use for winter decoration with ornamental grasses; each

### HUMEA elegans—Red, Whitish and Purple mixed; hardily biennial, majestic and graceful in habit, and make a fine appearance as centers to beds or as single plants on lawns; 3 feet

### IBERIS sempervirens, (Perennial Candytuft)

Pure white, pretty, profusely blooming little plants adapted for rockeries, &c.; ½ foot
IPOMOPSIS.

Beyrichi—Scarlet-colored flowers.................................................. 5

| TROPAEOLUM pentaphyllum—Scarlet tipped with green; graceful foliage | 25 |
Vegetable Seeds.

STANDARD, AND THE NEWER SORTS.

Of VEGETABLE seeds we present a very full list of desirable varieties required for Garden and Field—a list, we think, more complete than can be found in any other one catalogue.

Our stock of seeds consists of this country grown and imported. The American seeds are largely grown by ourselves; those that are not are grown under contract by our experienced seed raisers. The Foreign seeds are imported by us from the best growers of England, France, Germany and Italy.

The seeds we offer are FRESH GROWN. This can be relied upon. They will give entire satisfaction if properly treated.

We propose to do business on a small profit, and therefore, our prices are reasonable. Compare with other lists and determine for yourselves.

In comparing prices don't overlook the fact that our prices include postage and express charges.

NOTHING IS TO BE ADDED TO AN ORDER FOR POSTAGE OR EXPRESS CHARGES.

WE PREPAY CHARGES, whether by mail or express, on all seeds ordered by the packet, oz., 2 oz., ½ lb., ¼ lb., pt., pt. or qt. at catalogue prices.

Half Pounds or over are sold at pound rates; four quarts or over are sold at bushel rates; less than four quarts sold at quart rates.

BEANS, CORN and PEAS, when ordered at other than ½ pt., pt. and qt. rates, charges are to be paid by the purchaser.

Directions for cultivation are printed on each packet.

Our packets are FULL SIZE; we put up NO HALF SIZE.

ARTICHOKE.

Giant Globe or Crown—An old and standard variety. 10.30 .55 1.00 3.00
Naples, Large Green—NEW; of delicious flavor. 15 .40 .75 1.25 4.00

A hardy, productive sort. 5 10 .15 .20 .60
Carter's Improved Red Globe—A hardy,
productive sort. 5 10 .15 .20 .60
All the above Mangel Wurzels are truly desirable. Can't
make any serious mistake in selecting. All are enormously pro-
ductive, flesh solid and nutritious, good keepers. The Beets
being Globe-Shaped, crops are easily gathered, as they grow
mostly above ground. The Globe and Ovoid shaped are better
adapted for shallow soils than the Long-rooted Mangels.

Red Mammoth or Giant Long Red Mangel
Wurzel—An enormous cropper. 5 10 .15 .20 .60
Improved Norbitan Giant Long Red Mangel
Wurzel—This is also an enormous yielder. 5 10 .15 .20 .60
Carter's Improved Mammoth Prize Long
Red Mangel Wurzel— 5 10 .15 .20 .60
Golden Tankard, Carter's Improved—A valuable stump rooted sort of fine form and of very sweet flavor, and of golden yellow color.

The improved Norblan Giant and Carter's Mammoth, are very similar. They are distinct from other sorts. Tops are small, roots of good shape and of mammoth size, yielding immense crops per acre. Flesh solid and rich.

BORECOLE, OR KALE.

Dwarf Green Curled, (German Greens),— extra selected stock. 5.10 .25 1.00
Dwarf Green Curled Scotch—First quality 5.10 .20 .90
Dwarf Purple Curled—Extra fine 5.10 .20 .90
Tall Green Curled Scotch—Extra fine 5.10 .20 .90
Carter's Thousand Head Kale—"The hardest and most prolific Winter green in cultivation." 5.10 .25 1.00
Large-ribbed Thousand-headed—For sheep and lambs. 5.10 .20 .90

Culture of Kale the same as for Cabbage. Kale is grown for greens, and makes a delicious dish.

BROCOLI.

Early Purple Cape—A standard early and excellent sort. 5.35 .65 1.30
Carter's Champion—A large, latish, close heading variety. 5.35 .65 1.30
Superfine Early White—Heads good size, compact, and of creamy white color. 10.50 1.00

BRUSSELS SPROUTS.

Carter's Perfection—A new variety of excellent quality. 5.20 .35 .60 2.00
Improved Dwarf—A variety producing compact heads of excellent quality. 5.15 .25 .40 1.50

CABBAGE.

Very Early Etampes—NEW; "The best of all early Cabbages," so say Messrs. Vilmarin, Andrieux & Co. of France, of whom we import. Heads medium size, solid and of fine quality. 5.20 .30 .50 1.65
Tourlaville Early—Another very early fine heading sort. 5.20 .35 .60 2.00
Paris Market—NEW, very early—One of the finest early to be found in the Paris markets. 5.25 .45 .80 3.00
Early York—A standard old and tried early sort. 5.10 .20 .35 1.25
Early Wakefield, (TRUE JERSEY STOCK)—Early, medium size, good quality and very sure header. Popular market sort. 5.20 .35 .65 2.25
Henderson's Early Summer, (TRUE AMERICAN)—Fine early sort, coming in just after Wakefield. Large, firm heads. 5.20 .35 .65 2.25
Large York—An old and popular second early variety. 5.10 .20 .35 1.25
Early Sugar-loaf—One of the old, popular, second early. 5.15 .25 .40 1.25
Early Wyman—An excellent, second early, hard heading variety. 5.20 .35 .65 2.00
Early Winningstade—First quality. Cone or heart-shaped, hard-heading, second early. This variety has deservedly gained popular favor. Excellent summer, fall and winter. Depending on the time of putting out. 5.15 .25 .40 1.25
Early Bleichfeld Green—Short-stemmed, heads large and very solid. A second early German sort. 10.25 .40 .75 2.50

Imperial French Oxheart—An excellent second early sort. 5.15 .25 .40 1.30
St. John's Day Early Drumhead—A very hard heading, medium sized, second early sort, flat top head, fine. 5.15 .25 .40 1.30
Early Drumhead—Best French. Fine, late summer, fall and winter variety. 5.15 .30 .50 1.50
Fottler's Early Short-Stemmed Drumhead—Best American. 5.20 .35 .65 2.00
Fottler's Early Short-Stemmed Brunswick Drumhead—Best French. 5.15 .25 .40 1.25
Fottler's Drumhead for late summer, fall and winter use, cannot be too highly recommended. The heads are large, compact, crisp, tender, juicy, and of agreeable flavor.

Cannon Ball—A hard heading, Marblehead variety, of medium size. Good fall and winter variety. 5.15 .30 .50 1.50
Filderkraut—Pointed head. A very solid and sure heading variety; good, late summer, fall and winter. 5.20 .35 .60 1.75
Early Large Schweinfurt—Largest heading, early variety in cultivation; heads tender and crisp; summer and fall. 5.20 .35 .60 1.75
Stone Mason—A Marblehead sort. A sure and hard heading variety; excellent fall and winter, or late summer. 5.20 .35 .50 1.75
Marblehead Dutch—A close, finely shaped, compact, hard heading variety; fall and winter. 5.20 .35 .60 2.00

Premium, Large Flat Dutch, (AMERICAN)—Dwarfish, heads large, solid, broad and flat on top; tender, crisp and succulent; fall and winter. 5.20 .35 .50 1.75

Superior American Large Drumhead—Heads large, flattened, white inside, tender, crisp and well-flavored; seldom fails to form large, close, hard heads; for fall and winter. 5.20 .35 .50 1.75

Late Flat Dutch—Best French. Excellent fall and winter. 5.15 .25 .40 1.30
Large Late Drumhead, (ENGLISH GROWN)—Late and succulent. 5.15 .20 .35 1.00
Large Flat Dutch, (ENGLISH GROWN)—Fall and winter. 5.10 .20 .35 1.00
Large White Brunswick, Flat—Large heading German variety. 5.15 .25 .40 1.35
Quintal Drumhead—True French. Large heading sort. 5.15 .25 .40 1.30

Marblehead Mammoth Drumhead—One of the largest, close heading varieties extant. An American sort; fall and winter. 5.20 .35 .50 1.75

Green Glaze—Much grown at the south. 5.20 .35 .50 1.75
Improved American Savoy—Generally the Savoys make loose heads. This variety is a compact and sure hard heading sort. Best Savoy grown. Excellent fall and winter. 5.15 .25 .40 1.30

Green Globe Savoy—A favorite early variety, head medium sized, and finely solid. 5.15 .25 .40 1.25
Drumhead Savoy—Heads large, nearly round and tender. 5.15 .25 .40 1.50
Fine Blood Red—For pickling and salad. 5.15 .25 .40 1.30
Fine Red Dutch—For salad and pickling. 5.15 .25 .40 1.30

New Garfield Pickler—Pointed red cabbage. NOVELTY. 15 .35 .60 1.00 4.00

"A distinct, early, pointed red variety with solid head, in shape resembling the Winningstade, color being an intense reddish purple." If the Cabbage equals description and picture of it sent us it is an acquisition.
**CARROT.**

French Horn, Early Very Short Scarlet—Best forcing............ 5...10...15...25...50...1.00
Early French Scarlet Short Horn—Fine for table, largely grown... 5...10...15...25...50...1.00
Carentan Early Half Long Scarlet, without core—Forcing or open ground; excellent for table........... 5...10...15...25...50...1.00
Daniels Improved Half Long Scarlet—Orange red variety, very smooth and handsome; produces very large crops, which are more easily secured than crops of long-rooted sorts. Fine for stock... 5...10...15...25...50...1.00
Long Red Stump-rooted—Larger than Short Horn, and without core; table or cattle... 5...10...15...25...50...1.00
Long Scarlet Altringham—Fine, long field sort; for cattle... 5...10...15...25...50...1.00
Long Scarlet Altringham—An improved long sort; for cattle... 5...10...15...25...50...1.00
Improved Long Orange—A standard field stock variety.. 5...10...15...25...50...1.00
Half Long Scarlet Nantes Improved Stump-rooted—A variety without core, and of finest quality... 5...10...15...25...50...1.00
James' Scarlet Intermediate or Half Long Scarlet—(Pointed-rooted)—A very productive sort, and crop easily secured; excellent field cattle carrot... 5...10...15...25...50...1.00
Orange Belgian Green—Nutritious, large yielder, profitable for stock feeding... 5...10...15...25...50...1.00
Giant White Belgian Green Top—One of the best for stock; large crops easily secured... 5...10...15...25...50...1.00

**CAULIFLOWER.**

Italian Early Giant... 5...40...75...1.50...3.00
Mr. Benary, the German grower, says of this variety: "Extra fine sort, large white heads, early. This is the variety which is so highly productive in Northern climates." We have tested the Early Giant with various other sorts, and none of them equalled this in size and beauty of head, and sureness of heading.

Algiers—Mr. Benary says of this: "Extra fine sort. The celebrated variety of which large quantities are annually imported into Europe from Algiers!"... 5...40...75...1.50...3.00

Early Dutch, or London—An excellent variety... 5...30...50...90...1.60

Early Paris—A very sure, large heading, early sort, largely grown... 5...40...75...1.50...2.75

Earliest Paris—A fine, early variety... 5...40...75...1.50...2.75

Erfurt Earliest Dwarf—Mr. Benary says of this: "The best for forcing, and the earliest and best of all varieties."... 20...80...$1...3.00...6.00

Erfurt Early Dwarf—For forcing and open ground... 5...60...$1...2.00...3.50

Emperor, (Imperial)—A medium, early, sure, large-heading variety. Fine market sort... 5...30...50...90...1.75

Early Wallerchen—A favorite English sort; heads large, white, firm... 5...25...50...80...1.50

Lenormand Short Stemed—A long and superior French sort; not affected by drought... 5...25...40...75...1.50

Veitch's Autumn Giant—Heads large, white, firm, and compact. Our experience is that plants must be put out early or they will not head before the ground freezes... 5...25...40...75...1.25

Henderson's Early Snow Ball—Mr. Henderson represents this variety as being "the earliest of all Cauliflowers." Our stock is from Mr. Henderson. Pkt, 10c.; 1 oz., $1.25; ½ oz., $2.50; oz., $5.00.

**CELERI.**

Goodwin's Solid White—An excellent dwarf sort... 5...20...35...60...2.00
Boston Market—A popular market sort; true... 5...20...30...50...1.75
New Golden Heart or Golden Dwarf—Solid and of fine flavor... 5...20...35...50...1.75
Goldilocks—Large, Solid—New, French, from Vilmorin. Pkt, 25c.; ¼ oz., 60c.; oz., $1.00.

Dwarf, Large-ribbed White Solid—Large, solid French sort... 5...20...35...60...2.00
Sandringham Dwarf White—Solid, strong growing dwarf... 5...10...15...25...50...1.00
Henderson's Dwarf White—Solid, crisp and tender; good keeper... 10...35...60...1.00

Seymour's White Solid—The old and well known sort... 5...10...15...25...50...1.00
Turner's Incomparable Dwarf Solid White—An excellent English variety... 5...20...35...60...2.00
Carter's Incomparable Dwarf Crimson—English sort... 5...15...25...40...1.50

Wright's Grove Giant White—A very fine English variety. Dwarf and solid... 5...20...35...60...2.00

Red Giant Solid—Large French sort... 5...15...25...40...1.50

Solid Ivory—NOVELTY. Does not require "banking" or earthing up. Pkt, 25c.; ¼ oz., 5c.; 2 oz., $1.25; ¼ lb., $3.00.

This Novelty, "SOLID IVORY CELERY," is brought out by Messrs. Carter, Dunnett & Beale, seed growers and merchants, proprietors of several large seed farms in Essex, England, who say of it: "We have the pleasure to introduce for the first time, not only a new Celery, but what we believe to be the most perfect type of Dwarf White Celery that has ever come under the notice of the cultivator.

"Some of the most remarkable features of this Solid Ivory Celery are its extreme dwarf, compact habit, and beautiful white color through-out; while by reason of its neat growth it is specially valuable as being of the most simple cultivation, unlike as it may be planted upon the surface of the ground instead of in trenches, and all that is necessary in the way of earthing up can be done in a very simple manner by the hand, or with an ordinary draw hoe, a little care being taken to bring the stalks close together, and thus assist in its complete blanching. If the heads are tied with a little rough matting, in the same way as Cos Lettuce, it will assist not only in keeping the Celery perfect, but also in excluding superfluous moisture.

"As a Celery for the use of hotels and other large establishments it is unequalled, there being scarcely any waste in dressing it for table.

"As the name signifies, Solid Ivory Celery has been proved, after repeated trials, to be the most solid, crisp eating, and delicious-flavored variety in use, the peculiar fibres having been most marked.

"Solid Ivory Celery, unlike some other new dwarf Celeries now being offered, is a first rate keeper and not only will it remain fit for use for as long as any other variety of celery with which we are acquainted, but it will resist the effects of the most severe winters equally with any other Celery in cultivation.

"This Celery has been placed upon the dinner table on several prominent occasions, when its exquisite quality was spontaneously admitted by all who tasted it." Our stock of seed of the "Solid Ivory Celery" we received directly from Messrs. Carter, Dunnett & Beale.

**Henderson's White Plume—**This variety it is claimed, does not require "banking" or earthing up... Pkt, 25c.; ¼ oz., $1.50; oz., $3.00.

Mr. Henderson says of this NEW CELERY: "Naturally its stalk and portions of its inner leaves and heart are white, so that by closing the stalks, either by tying them up with matting or by simply drawing the soil up against the plant and pressing it together with the hands, and then drawing up the soil with the hoe or plow, so as to keep the soil that has been squeezed against the celery in its place, the work of blanching is accomplished." Again, "Its eating qualities are equal to the very best of the older sorts, being crisp, solid, and having that nutty flavor peculiar to the "Walnut" and some of the red sorts." Again, its culture is in all respects the same as that directed for the other sorts, with the exception that we are saved the trouble of high "banking" or earthing up."
CELERY—Continued.

Celeriac, or Turnip-Rooted Celery—The roots are turnip-shaped, and possess the flavor of celery. 5.15 25 40 1.50
Celery Seed for Flavoring. 10.15 .50 .50

CHERVIL.

Curled, or Double—Extra Moss Curled. Salad and soups. 5.15 25 40 1.50
Turnip-rooted Siberian—Nutty flavored when boiled. 5.15 25 40 1.50

CHICORY.

Large Rooted or Coffee—Roots for coffee; leaves as salad. 5.10 15 .25 .80
Improved Brussels Witloof—Excellent for salads. 5.10 15 .25 .80

COLLARDS.

Georgia, or Southern—Greens, used at the South as a substitute for cabbage. 5.15 25 40 1.50

CORN.

The following are the best garden varieties.

Adam's Extra Early—Earliest variety; kernels large, ears small. Not a Sweet Corn. 10.15 25 .45 3.50
Early Minnesota, Sweet or Sugar—One of the earliest varieties. 10.15 25 .45 3.50
Briggs' Early Sweet—As early as Minnesota. 10.15 25 .45 3.50
Early Marblehead Sweet—The earliest sweet; ears small. 10.15 25 .45 4.00
Moore's Early Concord—Second early sweet; ears large. 10.15 25 .45 3.50
Russell's Early Prolific—A superior second early Sweet Corn; ears good size. 10.15 25 .45 3.75
Stowell's Evergreen, Sweet or Sugar—Popular late variety. 10.15 25 .45 3.25
Mammoth Sweet or Sugar—Large late; 12 to 16-rowed. 10.15 25 .45 3.50
Rice Popping—Ears. 10.15 25 .45 2.25
Connecticut Popping—Ears. 10.15 25 .45 2.25

CORN SALAD.

Common Variety—Cultivated for its tender salad leaves. 5.10 15 .25 .75
Lettuce-Leafed—Cultivated for its tender salad leaves. 5.10 15 .25 .75

CRESS OR PEPPERGRASS.

Fine Double Curled—Excellent variety for salad. 5.10 15 .20 .50
Henderson's Australian, or Golden—Superior for salad. 5.10 15 .25 .75
True Water—Perennial aquatic variety. 10.30 .50

CUCUMBER.

Briggs' Early Green Prolific—A substitute for all other early varieties. Early and very productive. In shape between the Short Green and White Spine. Superior for salad and pickles. Profitable hot-bed variety. 5.10 15 .25 1.00
Russian Early Short Green—A very early sort. 5.10 15 .25 1.00
Early Green Cluster—Excellent for salad and pickles. 5.10 15 .25 1.00
Early Frame—An old, early, and popular sort. 5.10 15 .25 1.90

CUCUMBER—Continued.

Early Short Green—Prolific. An excellent early sort. 5.10 .15 .35 1.00
Boston Pickling—A short and popular pickling variety. 5.10 15 .25 1.00
French Green Short—Imported from Germany. Pickles and salad. 5.10 15 .25 1.00
Russian Shortest Green—Imported, recommended as desirable. 5.10 15 .25 1.00
Improved Early White Spine—A first class sort for hot-bed forcing, and also for garden or field culture; pickles or salad. 5.10 15 .25 1.00
Improved Long Green—A popular variety for pickle and salad purposes. 5.10 15 .35 1.00
Extra Long Green Turkey—A leading long green sort for pickles. 5.10 15 .40 1.50
Small Gherkin, or Burr—Can't recommend it for any use. 5.25

ENGLISH AND GERMAN FRAME VARIETIES.

Berlin Eel—Fine, long, thick, green variety, is also good for the open ground. Pkt. 15
Conqueror of the West—One of the best and highest-priced; packet of 10 seeds. .25
Duke of Edinburgh—Pure White. Pkt. of 5 seeds; very prolific. .25
Giant of Arnstadt—One of the finest, 20 to 22 inches, good bearer. .20
Giant of Arnstadt—Snow white. .20
Glorious of Erfurt—Snow white, extra, early, very long. .25
Goldsmith—Novelty of 1880. Handsomely shaped fruit; 20 to 25 inches in length; frame and open ground; very prolific. .25
Man of Kent—Fine long green. Frame or open ground. .15
Noa's Forcing—A very fine market sort, unusually productive. .25
Non plus ultra—Green, extra fine, long. .20
Rollinson's Telegraph—One of the best and most prolific. Pkt. of 5 seeds. .20
Roman Emperor—Fine long, open ground or frame. .15
Sion House Improved—Dark green variety, 20 to 24 inches long. .15
Swan-neck—Extra, 35 inches long, frame or open ground. .15
White-spined—Small-leaved, early, light green; about 18 inches long; one of the finest Cucumbers for frame. .25
Soozy Que—A Chinese variety, growing 5 feet in length. A curiosity, practically good for nothing. It is a variety that does not " coil like a snake." .20

DANDELION.

Common—Cultivated for greens; used same as Spinach. .5.15 .25
Improved Broad, or Lance-Leafed—Used same as Common. 10.25 .40

EGG PLANT.

Round Purple Imported—Medium size; firm fleshed. Pkt. 5.25 .40 .75
Improved New York Large Purple—Leading market variety. 5.30 .60 .100
Early Long Purple—A very early and productive variety. 5.25 .40 .75
Purple Very Early Dwarf—Earliest of all; quality good. 5.25 .40 .75
Long White China—Flesh is more melting and less stringy than other sorts. 5.25 .40 .75
Black Pekin—Blackish violet leaves and large fruit; ornamental. 5.30 .60 .100

Improved Large Green Nutmeg—Very productive; fruit large, round, flattened at each end, ribbed, netted, flesh thick, green and of the finest flavor.

Skillman's Fine Netted—Similar to Prolific Nutmeg.

White Japanese—Thick flesh, musky flavor, fine.

Netted Pine Apple—An excellent little sort, oval in shape, netted, flesh thick, green, juicy, sweet and rich.

The following are new English sorts and now for the first time offered.

Captain Larks—"The outer surface is a delicate cream color, evenly and prettily netted, the inner rind is of a pale green shade, and the deep and solid orange-scarlet flesh is deliciously rich and piquant. It grows to a large size." Pkt. of 5 seeds.

Emerald—"A new and distinct green-fleshed melon of exquisite flavor. It is very handsome in form with a remarkably thin skin; the flesh is melting and most delicious." Pkt. of 5 seeds.

Sir Garnet Wolseley—"A new and very valuable green-fleshed melon. It is beautifully netted, and of delicious flavor; a very prolific variety. Average weight 3 to 4 lbs." Pkt. of 5 seeds.

WATER MELON.

Phinney's Early—Oval shape; dark skin, mottled with light green; productive; grows to a large size; flesh deep red and of superior quality.

Mountain Sprout—Large, longish oval, green, marbled; flesh red and of very good quality.

Mountain Sweet—A popular standard sort; flesh scarlet, solid, sweet and delicious.

Peerless, or Ice Cream, (White Seeded true) Oval in shape, of medium size, light and dark green mottled, thin rind, flesh bright scarlet, solid to the center, and very sweet.

Black Spanish—Round, skin dark green, good size, flesh red, solid, sweet and rich.

Gipsy Striped, or Georgia Rattlesnake—A large, oblong, early, green mottled, red-fleshed sort of good quality.

Cuban Queen—An extra large sort; specimens have been grown that weighed 75 to 80 pounds; oval in shape, rind thin, ripens to the center, flesh solid, bright red, tender, crisp, melting and sugary, productive, and bears handling well.

Odella—Early and productive about the medium size, round, light green, flesh bright red and of fine flavor.

Dark Icing, or Ice Rind—Round, very solid, thin rind; flesh solid, and of a rich, luscious, sugary flavor.

WATER MELON—Continued.

Orange—Round, medium size, flesh tender, red and sweet; good quality; rind separable from the flesh when fully ripe like the peel from an orange.

Vick's Early—"Long, smooth, rather small, flesh bright pink, solid, sweet, and the earliest melon we are acquainted with."

Sealy Bark—A very large, oblong sort, with a dark, hard rind, having a scaly appearance, flesh crimson, solid, sweet, and free from fibre. On account of its quality and tough rind, it is an excellent melon for shipping.

Average weight about 35 pounds.

Citron, (Red Seeds)—For preserving

MUSTARD.

White English—For salads, greens and flavoring purposes.

Black or Brown Italian—For culinary use.

Southern Giant Curled—Much grown at the South for Salad.

Chinese—Leaves twice the size of the white, more succulent, color a vivid green, but pleasantly sweet; fine for salad.

NASTURTIUM, or INDIAN CRESS.

Tall—Dark crimson and rich yellow, mixed.

Dwarf—Various colors mixed.

The Nasturtium is both ornamental and useful. The seeds, while young and succulent, have a warm, aromatic taste, and are pickled and used as capers. The flowers, which are large and richly colored, are used for garnishing. It also makes a rich green covering for arbors, trellises, &c.

OKRA.

Long Green—Pods long and green, late.

Dwarf Green Improved—Earliest and best for the North.

The Okra is grown and used at the South as a vegetable, being chiefly used in soups and stews.

ONION.

Our stock of Onion Seed consists of home grown, Wethersfield, California and foreign grown. The foreign seed we import directly from the growers.

The home and California Onion Seeds are Wethersfield and Danvers varieties, and grown from Danvers and Wethersfield stocks.

The home seed was grown from pure and carefully selected bulbs by growers who have had many years of experience in onion seed growing for the old firm of Briggs & Bro.

Our stock of Wethersfield seed was grown in Wethersfield, Conn., by one of the oldest and most reliable Onion Seed growers of that town, and from pure, first-class bulbs.

Thirteen years ago Mr. R. W. Wilson left the Iowa seed farm of the old firm of Briggs & Bro. and went to California and began seed growing there for them. Mr. Wilson was the pioneer. The raising of Onion Seed in California proved a success, and the growing of it there has largely increased year by year ever since. It is now more than probable that all of the large seed houses east of the Mississippi deal largely in California Onion Seeds.

Crops of onions from California grown seed of Danvers and Wethersfield stocks ripen earlier than crops of the same varieties from seed grown anywhere east of the Mississippi river, if sown at the same time.

Home and Wethersfield grown Onion Seed have one advantage over California Onion Seed, and as an offset to this California seed has one advantage over the more eastern grown.
ONION—Continued.

If the spring is such that eastern grown seed can be and is sown early in spring, and if the latter part of the season should be favorable (not over wet) to the crop ripening up, the crop would be somewhat larger than a crop grown from California seed sown at the same time. The crop from California seed would, however, ripen more thoroughly.

From seed sown late in the spring, and with rather unfavorable weather later in the season, the California seed would produce a larger number of bushels of thoroughly ripened onions to the acre than eastern grown seed.

The Onion seed crops of 1885 are a good average, not so large, however, as those of 1883. Prices at present rule low with a prospect, as there is considerable foreign call, of their advancing as the spring of 1885 approaches. The quality of the seed is excellent. Those who may favor us with orders for Onion Seed will be furnished with seed of all the growth of 1884, and of first quality in every respect.

We shall be pleased to give special prices for large quantities.

HOME GROWN ONION SEED.

Danvers Yellow—Full medium size, thick, skin yellowish brown, flesh white, fine grained, mild flavored, and ripens off well. Desirable for family or market; very productive. 5.10.15 .30 .65

Yellow Globe Danvers—Like the above, except being more round or globular than the regular size of the variety above. 5.10.15 .25 .80

Large Yellow Dutch—A standard sort, medium size, flatish, skin yellowish brown, flesh white, fine grained, mild, ripens off well, good keeper. Excellent family or market sort. 5.10.15 .25 .75

Extra Early Red Wethersfield—A thick flatish sort, smaller and about 10 days earlier than the Large Red Wethersfield, close grained and a good keeper. 5.10.15 .25 1.00

Large Red Wethersfield—More generally grown than any other variety. It is large, very productive; ripens off well if seed is sown early in spring, and fall is not too wet. Though perhaps not so mild as some of the smaller sorts, still it is an excellent and popular onion for both family and market. 5.10.15 .25 1.00

WETHERSFIELD GROWN ONION SEED.

Danvers Yellow—Same description, &c., as above. 5.10.15 .30 .65

Yellow Globe Danvers—Same description, &c., as above. 5.10.15 .25 .80

Large Yellow Dutch—Same description, &c., as above. 5.10.15 .25 .75

Extra Early Red Wethersfield—Same description, &c., as above. 5.10.15 .25 1.00

Large Red Wethersfield—Same description, &c., as above. 5.10.15 .25 1.00

White Portuguese or Silver Skin (American Stock). Of medium size, early; skin silvery white, fine grained, mild, ripens off well, and is quite productive; an excellent sort for family use. 5.20.30 .50 1.75

Early Red Globe—A large, round, flat-skinned variety, larger than the Extra Early Red, and more globe shaped and larger; a fine sort. 5.10.15 .25 1.00

White Globe—Globe-shaped, pure white, solid ripens off with a very small neck; a handsome and choice sort; sells at a high price in New York market. 5.20 .35 .60 2.25

ONION—Continued.

Southport Yellow Globe—A new, very large, nearly globoid-shaped, straw-colored variety, of mild and pleasant flavor; handsome, very productive, good keeper and one of the very best sorts. 5.15 .25 .40 1.50

Southport White Globe—The same as the Yellow Globe, except in color. 10.20 .35 .60 2.25

Southport Red Globe—The same as the other Southport varieties except in color. 10.20 .35 .60 2.25

CALIFORNIA GROWN ONION SEED.

Danvers Yellow—The same as the more easterly grown, except the crops ripen off earlier. 5.10.15 .20 .65

Globe Danvers Yellow—Crops grown in California ripen earlier than crops from more easterly grown seed. 5.10.15 .25 .80

Large Red Wethersfield—The remarks with reference to the Danvers varieties, applies to the Large Red Wethersfield. 5.10.15 .25 1.00

ONION, NEW ITALIAN VARIETIES.

New Queen—A beautiful white or silver-skinned variety, a rapid grower, inch and one-half in diameter; fine grained and solid, "keeping sound from harvest to harvest, retaining to the last its exquisite flavor." 5.25 .40 .75 2.50

Norceca—An extra early flatish silver-skinned sort of excellent flavor; keeps well, splendid for pickles; much like the New Queen. 5.25 .40 .75 2.50

Marzajola—A distinct white, or silver-skinned, solid, fine grained, flatish variety of medium size and fine quality. The Italian grower says of it, "By far the earliest onion in cultivation." 5.15 .25 .40 1.50

Early Flat White Italian Tripoli—An early and beautiful white-skinned variety of rapid growth; mild and fine flavor. 5.15 .25 .40 1.50

Giant White Flat Italian Tripoli—A new, very large, white, flat variety of quick growth and mild flavor. Specimens of the weight of 25 pounds have been grown. 5.15 .25 .40 1.50

Large Italian Blood Red Tripoli—Same as above, except as to color. 5.15 .25 .40 1.50

New Giant Rocca of Naples—A splendid variety of onion; of delightful flavor; large, globular shape, light brown skin and of immense size. 5.15 .25 .40 1.50

White Flat Mammoth—NOVELTY OF 1882, "Bulbs 6 inches in diameter, flat in form and silvery white; of particularly mild and fine flavor. A heavy grower and unsurpassed for exhibition." 10.35 .60 1.00 3.00

NOVELTIES IN ONIONS.

"NEW, DISTINCT AND VALUABLE ONIONS."

"Carter's Golden Queen"—Messrs. Carter, Dunnett & Beale, say of it, "The most perfect miniature model that has come under our notice. The onions vary from an inch to an inch and a half in diameter; in shape somewhat resembling White Queen, but even more symmetrical than that variety. Skin of a delicate, transparent, golden-straw color. One Cold, Wetter Onion possesses all the characteristics of rapidity of growth and good keeping properties for which White Queen is famous, while the flavor is unusually delicate. Like White Queen, it is a Tripoli onion." Pkts. 15 .40 .70 1.25 4.00
NOVELTIES IN ONIONS—Continued.

"Carter's New Silver Ball"—Messrs. Carter, Dunn & Beale, say of this, "A very distinct and handsome silver-skinned Trippoli onion. It grows to the size of a Snowball turnip, as smooth, globular in form, with a beautiful silvery skin; flavor mild and delicious. This variety must prove highly valuable for exhibition purposes. It has been placed before the Committee of the Royal Horticultural Society, who pronounced it to be very handsome." "Silver Ball is a splendid onion in shape and flavor, quite distinct; very small neck." 15.40 .701.25 4.00

"Carter's Golden Globe Trippoli"—A very desirable novelty from the south of Europe. It grows to the size of the Giant Kossa, and the flavor is excellent. The skin is of a transparent golden-straw color, closely resembling the imported onions sold at Italian Warehouses. It will be found invaluable in exhibition collections. Suitable both for autumn and spring sowing. 15.40 .701.25 4.00

PARSLEY.

Fine Double Curled—A fine dwarf variety with beautifully crimped and curled tender leaves. 5.10 .15 .25 .80

Carter's Champion Moss Curled—New and superior; unapproachable for garnishing purposes; excellent for seasoning soups and stews; a pretty edging for the walks of the garden. 5.10 .15 .25 .80

Carter's New Fern-leaved—Extra selected. 5.10 .15 .25 1.00

Myatt's—Pale green, extra curle, fine. 5.10 .15 .25 .80

Hybrid Moss Curled—Extra selected, of the Moss Curled type; fine table decoration, &c. 5.10 .15 .25 1.00

Covent Garden Garnishing—A superior variety for garnishing. One of the best of the London Markets. 5.10 .15 .25 1.00

Hamburg, or Turnep-rooted—The most popular, used for flavoring soups. 5.10 .15 .25 .80

PARSNS.

Abbott's Improved Long Hollow-Crowned—A long, smooth, white, sweet variety of fine flavor. 5.10 .15 .25 .60

Carter's New Maltese—A fine, long-rooted variety, and claimed to be an improvement over other sorts. 5.10 .15 .25 .60

Short or Round Early French—A very early French variety. 5.10 .15 .25 .60

Sutton's Student—A half long, finely flavored sort. 5.10 .15 .25 .60

Parsons' Guernsey—Long-rooted, sweet and sugary. 5.10 .15 .25 .60

PEAS—Continued.

First and Best, or "Best of All"—Very early. A prodigious cropper; pods good size and well filled with peas of excellent flavor. 10.30 .35 .65 7.50

Carter's First Cropper—Extra productive variety. 10.15 .25 .45 3.50

Extra Early Kent—True. A standard, very early and productive sort; pods large, well filled; peas rich and of the finest flavor; 2 feet. 10.15 .30 .55 3.50

Philadelphia Extra Early—So nearly like the Extra Early Kent, it is difficult to determine which is which. 10.15 .30 .55 3.50

Improved Early Daniel O'Rourke—A very early, productive and popular market variety; pods fill well; peas of good size and firm quality. 10.15 .30 .55 3.50

McLean's Little Gen—The very best, early, dwarf, wrinkled pea grown; about 1 foot in height; very productive; pods large, well filled; peas tender, rich, sugary and delicious. 10.20 .30 .50 4.50

Extra Early Premium—Of the type of the Little Gen, a little more robust, but similar in other respects; choice. 10.30 .30 .50 4.50

Tom Thumb—True. A very early, robust growing, productive dwarf; height about 10 inches; pods of good size; peas excellent. 10.20 .30 .50 4.50

McLean's Blue Peter—A dwarf of the Tom Thumb type, height about 1 foot; prolific; pods large and well filled; peas of exquisite flavor. 10.20 .30 .50 4.50

Laxton's Alpha—A blue wrinkled pea of exquisite flavor and remarkable for its earliness and prolific bearing; 2½ feet. 10.15 .25 .45 4.50

Waite's Caractacus—A very productive and excellent early variety. 10.15 .25 .45 3.50

Laxton's William the First—A new, extra early, green marrow sort of fine quality; about 5 days later than Extra Early Kent; peas large. 10.20 .30 .60 5.50

Kentish Invicta—A very productive, early variety, producing straight, handsome, well filled pods of round blue peas of superior richness and flavor. 10.30 .30 .50 4.00

Drecar's Extra Early—The earliest and most prolific variety; an even cropper of excellent quality; height 2 feet. The crop can be gathered in two pickings, a very important item; also for a late fall crop it has few equals; the market gardener's favorite. 10.30 .30 .45 5.00

EARLY VARIETIES.

McLean's Advance—Dwarf, wrinkled Marrow, very early, only a little later than McLean's Little Gen; pods large, and peas of fine quality; 2 feet. 10.15 .25 .45 3.50

Bishop's Early Dwarf—An excellent, second early variety; a prolific cropper; 2 feet. 10.15 .25 .45 3.50

Day's Early Sunrise—A very early, large, white, Marrow pea of fine quality; 2½ feet. 10.20 .30 .50 4.00

Telegraph—New variety. Selected from Telegraph from which it differs in the seed being wrinkled, whilst the quality is superior. The pods are immense, and the peas so close together as to appear to be forming a double row in the pod; peas are large and of exquisite flavor; 4 feet. 10.30 .35 .65
PEAS—Continued.

"Carter's Pride of the Market."—Novelty, imported from England; "one of the most popular market peas in existence. In length of pod it is equal to Stragam, from which it differs in possessing a greater depth of color, with round, blue seed. It grows from 1 to 2 feet high, and bears grand pods well filled with large and fine flavored peas from top to bottom of the haulm."

LATER VARIETIES FOR GENERAL CROP.

Yorkshire Hero—A splendid, wrinkled Marrow, and one of the most desirable varieties in cultivation; is very prolific and delicious flavor. 10.25 20 35 50

Champion of England—A standard, and one of the best and most popular wrinkled varieties in cultivation; pods are large, peas green, rich and of the finest flavor: 5 fe$$. 10.15 25 45 3.50

Carter’s Stratagem—A first-class novelty; "the pea for everybody, whether rich or poor," the plant is dwarf, hardy and prolific; the pods of good shape and color, and filled with large, handsome, rich peas: 2 feet. 15.25 35 65

Forty Fold—This variety is recommended to us as an improvement on the Champion of England, and if it is such, it is one of the most desirable sorts grown. 10.90 35 60

British Queen—One of the best and most productive of the tall wrinkled marrows; of delicious flavor: 6 feet. 10.30 30 55 6.00

Dwarf Blue Imperial—Height of this variety is about 2 feet; the peas are blue, large and excellent; the pods are short and only a few peas in a pod. 10.15 25 45 3.50

Large White Marrowfat—A standard, large, late, market variety, with large, broad pods, well filled, of excellent quality: 5 feet. 15.25 45 2.25

Large Blackeyed Marrowfat—A popular market sort; very prolific; pods are large and full; peas are rich and good. 10.15 25 45 2.25

PEAS—EDIBLE PODS.

Dwarf Sugar—Pods large, broad, succulent, tender, sweet and rich; used like Snap Short-Beans; 3 feet. 10.20 35 60

Tall Sugar—Large, tender, rich pods; used as Dwarf Sugar; 5 feet. 10.90 35 60

ALL PEAS OFFERED BY US ARE HAND-PICKED.

PEPPERS.

Squash or Tomato Shaped.—Large, ribbed, flesh thick, mild. 5.30 35 60 2.00

Sweet Mountain or Mammoth—A large variety, rich and thick, with a long inch in diameter, flesh thick and pungent, fine for pickling and mangoes. 5.20 35 60 2.00

Long Red—Fruit brilliant red, three to four inches long, inch to inch and a half in diameter, flesh thick and pungent, fine for pickles, &c. 5.20 35 60 2.00

Golden Dawn—A new pepper, and shape much like Mountain Sweet, color, golden yellow, flesh thick and mild. 10.25 50 1.00

The foregoing varieties are best of all.

PUMPKIN.

Large Cheese—A superior variety for table use. 5.10 15 20 .50

Cushaw, or Crook-Neck.—Excellent for table use and for stock feeding; flesh yellow, solid, fine grained and sweet. 5.15 20 30 .90

Sugar—Smaller than the Large Field, but of finer grain, sweeter, and very productive; very fine for pies. 5.10 15 .80

Nantucket, or Negro.—A small, black skinned sort, flesh yellow, solid, fine grained and sugary; excellent for pies. 5.15 25 40 .90

Connecticut Field, Large Common Yellow.—A very productive sort, grown principally for feeding stock; good for pies. 2 oz., 10c.; ½ lb., 15c.; ¼ lb., 25c.; lb., 40c.

RADISH.

Shall be pleased to give special prices for larger quantities.

Olive-Shaped White.—The olive (oval or oblong) shaped sorts are very early, tender, crisp and of mild flavor. All are well adapted for forcing. They are also very desirable for garden culture. It is claimed that they are not so liable to become wormy in certain soils as the long-rooted varieties. These remarks hold good reference to all of the short and turnep rooted kinds. 5.10 15 .75

Olive-Shaped Scarlet.—Like the above except in color. The scarlet is a popular color. 5.10 15 .75

Olive-Shaped Golden Yellow.—A handsome color; quality like the other sorts. 5.10 15 1.00

Olive-Shaped Violet, White Tipped.—A delicate, pretty color; tender and crisp and mild flavored like the other olive-shaped sorts. 5.15 25 1.25

Olive-Shaped Scarlet Globe.—New. Of brilliant red color, short-leafed, flesh fine and white, very mild flavor. 10.20 35

Earliest Scarlet Erfurt.—Short-leafed, extra early, deep scarlet, the finest sort for frame. 10.15 25 1.00

French Breakfast—A scarlet, white tipped, oval shaped sort; tender, brittle, crisp and of mild flavor. Fast becoming a favorite. Hot-bed or garden. 5.10 15 .75

Early White Turnep.—A standard sort for hot bed and garden; fine quality. 5.10 15 .65

Extra Early White Turnep-Rooted.—A rapid growing variety, of finest quality, forcing or out-door culture. 5.10 15 .65

Early Yellow Turnep.—Like the other turnep varieties except in color; early, mild and pleasant. 5.10 15 .75

Early Scarlet, or Red Turnep—A standard sort; small top, very early, tender, crisp and mild. 5.10 15 .65

Shall be pleased to give special prices for larger quantities.

Early Purple Turnep—Color deep purple, very early, and of fine flavor. 5.10 15 .75

Early Scarlet Turnep, White Tipped—A fancy sort, of excellent quality. 5.10 15 .75

Grey Summer Turnep—A very early variety, differing from the others in quality and in color. 5.10 15 .75

Golden Globe Turnep—An excellent, early summer variety, of finest quality. 5.10 15 .75
RADIISH—Continued.

Early Long Scarlet Short-top—This is the standard sort of long-rooted Radish. The top is small, root bright scarlet, 6 or 7 inches long, grows quick, is tender, brittle, crisp and of mild flavor. Second to none for family, or market garden. Special prices for large quantities.

Early Long Scarlet—Top a little larger than that of Short-top; root the same. An excellent sort.

Covent Garden Special Long Scarlet—A favorite of London Covent Garden market. The root is a beautiful scarlet, and of the finest quality.

Long Salmon Colored—Similar to Short-top, but of a yellowish red color. Fine.

Long White Naples Summer—An excellent long-rooted variety; flesh white, crisp and mild.

Wood's New Frame—Half long; fine for hot-bed forcing or out door culture; early, mild, brittle, and of fine flavor.

Long Russian Frame—Exotically grown. root 8 to 10 inches in length, an inch in thickness; flesh white, delicate and of fine flavor.

FOLLOWING ARE WINTER VARIETIES OF RADISH:

Chinese Rose Winter—Root short and thick, bright red color, very smooth, flesh firm and pungent; one of the very best for winter.

Chinese White Winter—Same as Rose Winter, except as to color.

Black Spanish Winter, Round—A standard sort; roots large, skin black, flesh white and firm, hardy and a long keeper; one of the best.

Black Spanish Winter, Long—Like the Round, except in shape.

Spanish White Winter, Long—Similar to above, except in color, and said to be milder.

California Mammoth White Winter—Chinese variety, first grown in this country in California. Roots are from 10 to 12 inches long, and about 3 inches thick. A fine Winter sort for salad purposes.

Raphanus Caudatus, or Rat-tail Radish—A Japan sort. It's the pods that are used; they grow from 2 to 3 feet long and are used as a salad, boiled in or pickles; really more curious than useful.

Our Radish seeds are all of this year's importation. The Imported is far superior to American grown. The American deteriorates in color.

RHUBARB.

Linnaeus—Large, tender and excellent flavor.

Myatt's Victoria—A large, choice and favorite variety.

SALISFY, OR OYSTER PLANT.

New Blue Flowered French—The root of the New Blue Flowered, is larger, smoother and more perfect in shape than the ordinary and of the finest quality.

SALSIFY—Continued.

Long White—An excellent marked variety.

Long Black, or Scorzonera—Inferior to other sorts.

Scolymus Hispanicus—A Spanish variety of Oyster Plant. Not much grown here.

SEA KALE.

Sea Kale is cultivated for its blanched shoots, which are cooked as asparagus. Not much grown on account of the care required to grow it.

SORREL.

Large-Leaved Garden—Used for salads.

SPINACH.

Round Leaf, or Summer—The standard market sort; equally good for either spring or fall sowing.

Lettuce-Leaved—A new variety of superior quality; leaves, large, thick and deep green.

Monstrous Virolaya—Extra large round-leaved. A splendid variety; leaves large, broad, round, thick and fleshy.

New Zealand—A robust growing variety, producing an abundance of leaves throughout the summer; endures heat and drouth well. Plants should stand 2 feet apart.

Bloomdale—This variety is said to be an improvement on the Savoy-leaved. The leaves are numerous, succulent, rounded at the ends, blotted and blistered and partially rolled.

Savoy Large Round Leaved—A thriving growing variety, producing an abundance of thick, succulent, crimped or blistered leaves; gardener's favorite.

Long Standing Round Seeded—A new French sort; very thick, large, succulent leaves. "Will stand from 2 to 3 weeks longer than any other sort before running to seed." So says Mr. Vilmorin.

New Thick-Leaved—Leaves large, tender, and thick.

Flanders—A hardy, broad-leaved variety, but not crimped.

Carter's Market Favorite—NOVELTY.

"This valuable NOVELTY shows a most decided improvement in shape, substance of leaf and duration of plant, remaining in full condition for use a long time after all other varieties sow north by south with it have run to seed and become useless for table purposes."

SQUASH.

Early White Bush Scallop—An early, productive, flat sort; flesh light colored, fine grained and of good quality.

Early Yellow Bush Scallop—Like the above, except in the color of its fruit. The Yellow, however, is generally preferred.
SQUASH—Continued.

Early Bush Summer Golden Crookneck—
Esteeemed as one of the choicest, if not the best, of summer varieties; bright yellow; skin warty and thin; flesh dryish and of good flavor

Perpetual Green—Described as a winter summer Squash; a strong grower and large yielder, as many as 24 having been produced on one vine. The squashes are from 4 to 6 inches in diameter, of a creamy white, with thin, smooth shell, slightly ribbed. The flesh cooked, is dry, sweet and rich in flavor. In a dry, cool place, will keep till spring.

Vegetable Marrow—A favorite English sort; flesh white, soft and of rich flavor; summer and early fall.

Turban or Turk’s Cap—A good late variety; flesh yellow, thick and fine grained; sugary and well flavored; fall and early winter.

Essex Hybrid—A cross between the Hubbard and American Turban, having the shape and fine qualities of the Turban, with the dryness and hard-shelled fruit of the Hubbard. A good keeper.

Marblehead True—Flesh sweet, dry and delicious. Fruit about the size of the Hubbard, and keeps well.

Canada Crook-Neck—True. A small early variety of winter crook-neck; one of the best for keeping.

Boston Marrow—About ten days later than the Bush varieties; a good keeper, flesh orange colored, fine grained and excellent fall and winter; fine for pies.

Hubbard—A standard variety and a favorite; flesh, bright yellow, fine grained, very dry, sweet, and of fine flavor, and a fine keeper.

TOMATO.

Little Gem—The earliest variety and a very prolific bearer. The fruit is sweet, but too small to be desirable.

Carter’s Green or Golden Cabbage—Large cropper, very early, fruit a little below medium size, bright golden yellow, perfectly smooth; flavor exquisite, combining when cooked of that of the apple and tomato. A choice variety for early use and canning.

Early Mayflower—This variety is earlier, larger, and smoother than Gen. Grant, but much like the Grant in color and quality; color, bright red, ripens up to the stem; flesh is solid and of a rich flavor. One of the best for general crop, either for family or market.

Carter’s Dedham Favorite—An English NOVELTY. “Awarded a First Class Certificate of Merit by Royal Horticultural Society.” In Dedham Favorite, raised by Messrs. James Carter & Co., we have a variety that is perfectly distinct, and so remarkably good in every respect that it may be safely described as a most valuable acquisition. The fruits are of large size, globular in form, quite smooth, and of a rich ruby red, and as round as an orange. Flesh solid and of high quality.”—Gardener’s Magazine.

Livingston’s Favorite—Mr. Livingston says of the Favorite: “It is the largest perfect shaped tomato in cultivation, smoother than the Paragon; does not crack or rot; is a darker red than the perfection; ripens evenly and at any time of the year; is a good sort, holding its size to the end of the season.

General Grant—This is a superior family and market variety. The fruit is large, smooth, of bright red color; ripens up rapidly and thoroughly, is solid and of a most agreeable flavor, much like the Mayflower.

Briggs’ Beauty—A new, superior, large, productive, early variety. Color a beautiful rich, dark carmine red. Fruit is nearly as large as Trophy; as smooth and perfect in shape as the Excelsior, but larger and of better flavor; round, a little flattened; solid, and, unlike the Trophy, it ripens well about the stem. Excellent for canning or salad purposes.

**TOMATO—Continued.**

Golden Trophy—A sport from the Red Trophy. A rapid grower, very productive, ripening about a week earlier than the Red Trophy, beautiful canary yellow; fruit, solid and of fine quality, like the Green Gage, having an apple flavor. .......... 5.15 30 .55 1.00

Red Trophy—This variety has the standard sort. Fruit is very large, generally smooth, ripens early for so large a sort, and is of fine quality; very productive. .......... 5.15 20 .35 .65

Island Beauty—This variety is of the Trophy type. It is considerably larger than the Trophy, will average smoother, and with us ripened up better about the stem. The fruit is solid and of fine flavor. .......... 5.20 .35 .60 1.00

Rochester—This is also of the Trophy type. It is larger than the Trophy, and more irregular in shape. Can be reaped at any time, to a big recommend. Try it. .......... 5.20 .35 .60 1.00

Garfield—This is the largest tomato grown. It is very irregular in shape and would advise the growing of it only as a curiosity. .......... 10.25 40

The foregoing list embraces all of the best varieties of the Tomato. We take a good deal of pride, and not a little pleasure, in growing Tomato Seed. We allow no tomatoes to be picked for the market and save seed from the finest fruit only. In addition to the foregoing we have the following varieties, which we really consider inferior sorts;

Red Currant—Pkt., 5 cts.; 1 oz., 20 cts.; Oz., 35 cts.

Red Cherry, Yellow Cherry, Tilden.

Plum-Shaped Yellow, Large Yellow.

Pear-Shaped Yellow, Early Smooth Red.

Vick’s Criterion, Maupay’s Superior.

Canada Victor, Blount’s Champion.

Broad-leaved Dwarf, Earley’s Defiance.

Orangefield, Keyes’ Early Prolific.

Dwarf Orangefield, Ford’s Early Cluster.

Early Dwarf Red, Belle de Leuville.

**TUNER—Continued.**

Jersey Lily—Unquestionably the most perfect in outline and the earliest white Turnep grown; a clear white root and distinct, small top. .......... 5.10 .15 .25 .75

Early Snowball—A very early, handsome, round variety with a snow-white skin and white, firm, sweet flesh; excellent for table, and its attractive appearance would make it a saleable market sort. .......... 5.10 .15 .25 .75

Jersey Navel—A long-rooted, early, fine fleshed, delicate, sweet variety for table use. It is very popular in the Paris markets where it is esteemed one of the best. .......... 5.10 .15 .25 .75

Early White Stone—A large, early, round, smooth, white sort; flesh hard, white and excellent; fine for table and a good variety for early spring and late summer sowing for market. .......... 5.10 .15 .20 .65

Early White Flat Dutch, Strap-Leaved—An excellent, early garden variety; bottoms easily and rapidly, and under conditions that would cause failure in some other sorts; an excellent kind for the south as well as for the north. It is an excellent table sort being quite solid, tender and sweet. .......... 5.10 .15 .20 .65

Pomeronian White Globe—Lateish and very productive. The roots in a suitable soil grow to a large size, often weighing ten to fifteen pounds; are globular in form; skin white and smooth. Useful for table and feeding stock. .......... 5.10 .15 .20 .60

Large White Globe—The old field variety, grows to a large size; is a big yielder, and a very profitable sort to grow for stock feeding. .......... 5.10 .15 .20 .50

Large White Flat Norfolk—This is the old “Flat Field” sort, green above ground and white below; a heavy cropper, the roots growing on good soil to a very large size. Grown principally for stock feeding, though the roots when young, are very good for table use. .......... 5.10 .15 .20 .55

Long White or Cow Horn—Flesh white, fine grained, sweet, keeps well, and is one of the best for all culinary purposes. .......... 5.10 .15 .20 .65

Long White Tankard—Excellent field or garden, for stock or table; root tapering, 8 to 10 inches long, 4 to 5 thick; green above ground, white below. Flesh white, firm, sweet and of good flavor. .......... 5.10 .15 .20 .50

Long Red Tankard—Like the White Tankard, except that the part of the root above ground is purple or red. It is white below ground and flesh white. .......... 5.10 .15 .20 .65

Extra Early Purple Top Munich—One of the earliest if not the earliest turnep grown. It is regarded as holding the same place among turneeps that the Egyptian variety does among the beet family—that of being the earliest of all; flesh white, with bright purplish red top. A splendid variety for first crop. .......... 5.10 .15 .25 .80

Veitch’s Early Red Globe.—A fine garden variety, smooth, firm, globular in shape, and of excellent quality for table use. .......... 5.10 .15 .20 .60
TURNEP—Continued.

Early Flat Purple-Top Strap-Leaved.—This variety has become very popular and is now in very general use as a garden and field sort, for both table use and for feeding to stock. It is early, bottoms quick and is more sure to make roots than any other sort we know of. The root is flat, smooth and uniform in shape; the leaves are few and narrow; the skin above ground is purplish red, below white; flesh white, firm, sugary, mild and well flavored; size, full medium, It is the best of Turnips to sow among corn or upon small patches of garden where early potatoes, or peas, or beans have been taken off. 5.10.15 .20 .60

Early White Flat Strap-Leaved.—Like the Purple-Top Strap-Leaved except in color. An excellent sort. 5.10.15 .20 .60

Red-Top Flat Norfolk.—An excellent variety for table use and for stock feeding, very much like Purple-Top Strap-Leaved, except in the leaf; the root is handsome, flat-shaped, purple above and white below; flesh firm and good for table and very desirable for stock feeding. 5.10.13 .20 .55

Carter’s Improved Purple-Top Mammoth.—A very large, quick growing, globe-shaped, productive, purple-top sort; flesh, firm and sweet; good for table and very desirable for stock feeding 5.10.13 .25 .75

Grey Stone.—Field or garden, table or cattle, round in form, flesh hard and sweet. 5.10.15 .25 .75

YELLOW FLESHED VARIETIES.

Early Yellow Dutch.—An excellent sort for table use; smallish, flesh yellow, firm, tender, fine grained, mild and sweet. One of the best for garden use. 5.10.15 .25 .75

Early Yellow Finland.—A small, early, flat, garden variety, flesh bright yellow, tender, close grained, of a sweet and sugary flavor. A choice variety for table use. 5.10.15 .25 .75

Early Yellow Stone.—A most excellent yellow fleshed variety for table use, and good for stock feeding. The roots are of medium size, very firm and of a rich, sweet flavor. A long keeper. 5.10.15 .20 .65

Robertson’s Golden Ball, or Orange Jelly.—One of the very best of the yellow Turnips. It is globe-shaped, skin bright yellow, flesh yellow, fine grained, solid, rich and of excellent flavor. Its keeping qualities are superior. A first-class table variety, and on account of its keeping qualities a very desirable Turnip to feed to stock after Strap-Leaf. 5.10.15 .25 .75

Early Yellow Malta.—An excellent table variety; roots medium size, skin bright orange yellow, tender and sweet. 5.10.15 .20 .65

Yellow Aberdeen, or Purple-Topped.—A very productive, hardy sort, good keeper, globe-shaped; color pale yellow with purple top. Very firm in texture, and closely resembling the Ruta Baga in good keeping qualities; good for either table or stock. 5.10.15 .20 .65

Yellow or Amber Globe.—One of the best varieties for general crop; flesh very firm and sweet, and keeps well until late in spring; grows to a large size, and is excellent both for stock and table use. 5.10.15 .20 .55

TURNEP—Continued.

Sweet German.—Seed, best Nautucket grown. A superior variety for table use, and good for stock feeding. The flesh is white, solid, fine grained, firm, sweet and of excellent flavor. It will retain its firmness, and its other good qualities until the next summer. The seed should be sown about the time of sowing Ruta Baga seed. 5.10.15 .20 .65

RUTA BAGA OR SWEDISH TURNEPS.

White Sweet, or White Russian or Swede.—This variety is well adapted for table use, it is also a good kind for stock. Roots are of medium size, quite smooth and even, greenish above ground and white below; flesh remarkably firm and solid, of fine texture. Sweet and of excellent flavor. One of the best, if not the most desirable of all the Swedes for table use. Its keeping qualities are extraordinary, remaining fit for use until very late in the following spring. 5.10.15 .20 .65

Laing’s Improved Purple-Top.—One of the earliest of the Ruta Bagas; a productive, handsome variety of superior quality for table use; purple above and yellow under ground; a long keeper. 5.10.15 .20 .65

Beck’s Improved Ruta Baga.—A smooth, large growing variety, bulb firm, good keeper; excellent table and stock. 5.10.15 .20 .60

Skirving’s Liverpool Purple-Top Ruta Baga.—A standard sort, extensively cultivated for table use and stock; roots full medium size, remarkably smooth and firm, 5 to 7 inches in length and 4 or 5 in diameter, size depending upon soil and season; grown upon suitable soil the neck is small and short; skin above ground is purple, below yellow; flesh yellow and of solid texture, sweet and well flavored; a good keeper. 5.10.15 .20 .55

Waite’s Large London.—Larger than Skirving’s; an excellent long keeping Purple-Top yellow fleshed variety; table use or stock feeding. 5.10.15 .20 .55

Shamrock.—It is claimed by the growers that the Shamrock is the finest Purple-Top Ruta Baga in cultivation, neck is small, top small, root smooth, large and firm in texture, an excellent keeper, and good for table use and stock. 5.10.15 .25 .75

Marchill’s Extra Fine Purple-Top.—A very popular English variety, and regarded as one of the very best. 5.10.15 .20 .65

Carter’s Imperial Purple-Top Hardy Swede.—An English variety, highly recommended as producing extraordinary crops; valuable for stock feeding and also for table use. 5.10.15 .25 .75

Bangholm.—This is also a superior English variety, and one of the most popular of that country. It grows to a large size, the neck is small, few side roots and is a large yielder; skin yellow with purple top, flesh yellow, sweet and solid. 5.10.15 .20 .55

Miner’s Improved.—This is claimed to be a great improvement on previous varieties. 5.10.15 .20 .55

White Red Top.—A French Ruta Baga with reddish purple-top, very tender, fine grained, sweet and solid. 5.10.15 .25 .70
**HERB SEED—Continued.**

Marjoram, Sweet—*Origanum Majorana*. A plant having a pleasant aromatic flavor, and is employed in various ways as a seasoning. The young, tender tops are used green for flavoring, or they may be dried for winter use. 5.20 .35 .90

Rosemary—*Rosmarinus officinalis*. A hardy perennial; the flowers and leaves of which have a strong aromatic fragrance like camphor. It yields by distillation a large proportion of fragrant oil. 5.25 .40 .75

Rue—*Ruta graveolens*. A hardy perennial medicinal plant. The leaves are bitter and so acid as to blister the skin. It is a stimulant and anti-spasmodic, but must be used with great caution, as its use may result in injury. 5.15 .25 .40

Saffron—*Crocus Sativus*. A hardy annual from Egypt. It is cultivated on account of its orange colored flowers which are used in color. 5.25 .15 .25

Sage—*Salvia officinalis*. A hardy perennial. It is well, however, to sow seed every second year, as one and two-year-old plants afford finer flavored and a larger and a greater abundance of leaves than older plants. The leaves are used in flavoring and dressing, and for medicinal purposes. Our seed is the "Broad-leaved English". 5.20 .25 .60

Summer Savory—*Satureja Hortensis*. A hardy annual. A culinary, aromatic herb, used in flavoring or seasoning dressings and soups. 5.15 .25 .40

Thyme—*Thymus Vulgaris*. A perennial, highly aromatic, medicinal and culinary herb. The young leaves and tops are used for soups, dressing and sauce, and a tea is made of the leaves, which is a great remedy in nervous head ache. Although Thyme is perennial, yet after 2 or 3 years it becomes stunted and unproductive, and like Sage, requires to be raised periodically from seed. Our stock of seed is of the Broad-leaved Green. The best. 5.40 .75 1.25

Wormwood—*Artemisia absinthium*. A perennial. The whole plant is very bitter and possesses powerful medicinal qualities. The leaves are used as a tonic and vermifuge, and it is also said to be beneficial to poultry, and should be planted in poultry grounds. 5.25 .40 .75

Directions for the cultivation of Herbs, as well as all other plants, are printed on each packet.

**MIXTURE OF FLOWER SEEDS.**

The Aster class of Flowers, and the Balsam, Diasnthus, Pansy, Petunia, Phlox, Stock, Verbena, and a few others, are the most desirable of annual flowering plants. The difference in the quality of the seed of these various classes is very great. The least desirable plants produce the most seed and the choicest the least. As a consequence bad seed is cheap and the best quality is expensive. Poor plants and flowers are a disappointment, but the finer plants and flowers are looked upon with pleasure. Cheap seed is high at any cost. We import our flower seeds from London, Erfort and Paris from growers who would not send out a poor article, and still there is a difference in the quality of their seed. That which they grow as mixed is not so desirable as that grown as separate named varieties or colors, and for this reason we import largely of named varieties, and do the mixing ourselves. Those who buy our mixture will get seed of the best quality that can be had. Of course, the separate colors, each by itself, are desirable, but all can not afford to buy full lines of colors, and therefore use the mix. See page 48 for some of the separate colors and our mixtures. See mixtures also of Biennials and Perennials &c., &c.
COLLECTIONS OF SEEDS FOR THE VEGETABLE GARDEN.

There are those who do not care to take the time and trouble to select from the Catalogue the seeds required for their vegetable gardens. To accommodate such parties we have made up the following collections, and in doing so we have discounted very liberally from catalogue prices. The assortments of the collections have been arranged with a good deal of care, and we think the varieties are well apportioned. The assortments are arranged with reference to a succession of vegetables throughout the season. We take great care to have all seeds fresh, and choice in every other respect.

Collections Nos. 1, 2, 3 and 4, will be sent by express at the expense of the purchaser; Nos. 5, 6 and 7 will be forwarded by mail, postage prepaid by us, to any address in the United States, on receipt of the prices affixed.

We trust many will take advantage of this offer of assortments, by sending in their orders for them.

BRIGGS BROS. & CO., ROCHESTER, N. Y.

W. S. RAYMOND, who took premium on Beets, buys his seed of of Briggs & Bro.—Connersport, Pa., Journal.

At the Kewanee the Bro.—Seymour, Wis., Edw. Bach took first premium on Beets; seed from Briggs & Bro.—Kewanee Enterprise.

Dr. FRED. A. BALLARD, writing from Oazakw, Kansas, speaks of "Mangel Wurtzel Beets two and one-half feet long and eight inches in circumference.

BEST CABBAGES, MRS. M. C. SOWERS; second best to the same.

The seeds were purchased of Briggs & Bro.—Janeboro, Ill., August 2.

J. T. FEAS took first premium in Cabbage Seed, and five premiums in Caulliflowers, and seed of Bricks & Bro.—Hampton, Iowa, Recorder.

Mr. DANIEL VICKERY took a number of premiums on vegetables at the County Fair. Some of the vegetables procured from Mangel Wurtzelt Cauliflowers, know are superior kinds, from having them on our table. The Peppers and Cabbage and Cauliflowers were very tender and rich.

Dr. FRANK W. HANSON, writing from Oazakw, Kansas, speaks of "Schweinfurt Cabbage 12 to 15 inches in diameter.

S. G. FOSTER, first premium for Orange German Carrot. Seed from Briggs & Bro.—"Kewanee Enterprise.

The seeds were bought of Briggs & Bro.—Niles, Mich., Democrat.

W. H. MILLER, writing from Benning Bruce, Mc. Co., says: "We are breeding our vegetables this season to the highest of perfection, and will be glad to sell any of our seed.

GEO. L. KABRIT, writing from Blacksburg, Montgomery Co., Va., says: "We sent about 500 to the early Sweet Corn was excellent.

ALPHONSOM MOUTON takes first premium on Sweet Corn (Briggs) Early grown and three years, from seed procured of Brigs & Bro.—Rock Island, Ill., Union.

At the Kewanee County (Wis.) Agricultural Fair, Edw. Bach took the first premium on Cucumbers; seed from Briggs & Bro.—"Kewanee Enterprise.

W. H. HECK, first premium on Trophy Tomatoes, Cucumbers and Carrots; also on best collection of Vegetables. The seeds were procured of Briggs & Bro.—"Kewanee Enterprise.

Dr. ALPHONSOM LAZER, writing from Trenton, O., says: "Our Vegetables raised from seed purchased of you, carry the largest number of premiums, although the competition was very strong.

GEO. L. KABRIT, writing from Blacksburg, Montgomery Co., Va. says: "The Melons were fine, although the season was very dry. They were the sweetest I ever tasted.

SAMUEL WILLIAMSON, of Clay township, took a premium at the County Fair, on Musk Melons. Seed from Briggs & Bro.—Logansport, Ind., Journal.

Best Water Melon, MRS. I. F. BAIRD. Seed from Briggs & Bro.—New Hampton, Iowa, Courier.

MRS. A. W. PRESTON was awarded first premium on best variety of Garden Vegetables. They were raised from seed procured of Briggs & Bro.—North Adams, Mass.

MESSRS. LARMORE & DEAN, writing from Niles, Mich., say: "We shall continue to sell your seeds, as we have for the past ten years, and as others, as we are satisfied with your results. Your seeds are the best.

JAMES B. MOORE, Redwood Falls, Minnesota, took premium at the Redwood Co. Fair, for best White Turnip, Silverkin Onions and White Parsnip. Seed purchased of Briggs & Bro.—"Kewanee Enterprise.

G. W. BRADLEY, Secretary.

We noticed some Onions which excelled anything growing in this country; exhibited by A. J. EVANS, of Walnut township, and were grown of seed procured of Briggs & Bro.—Seymour, Iowa, Republican.

W. E. MATHERS, Jonesboro, Tenn., takes premiums on Beets and Onions; seed from Briggs & Bro.

W. S. RAYMOND, writing from Connersport, Pa., says: "I exhibited Wethersfield Onions from your seed, seven inches in circumference.

The seeds for the Onions which took first premium at the Fair, were furnished by Briggs & Bro.—Williamsburg, Ky., Sentinel.

The seeds from which the Onions were raised that took the first premium were raised at Kewanee, Iowa, Press.

JOHN MCKAY, of Columbus, Columbia Co., Wis., who took first premium on Onion, at the Logan county Fair, says: "Our Onions were raised from seed purchased of you, and I had not one peck of scullious, which is the grand point in growing Onions.

FIRST premium on Garden Peas—Briggs & Bro.—Rock Island, Ill., Union.

C. N. DEAN, took first premium on Red Onions, best Early Peas, best Cabbage, best Pepper Plant, best late Peas.—Cleveland, O., Bu. known for largest display of Garden Vegetables, S. ADAMS.

He is in the advance in the line of garden products and buys his seed of Briggs & Bro., Rochester, N. Y., and I think he has been greatly disappointed this year.

H. H. WHEELER, Hampton, Iowa. "I got the first premium and diploma on the largest and best variety of vegetables, and they were raised from seed procured from Briggs & Bro., and if I do not have better luck than you, it will be because one or two gets seed from you and has better luck than I do."

The best display of garden products, embracing all the standard varieties that the first and second premiums from which these grew were taken at Briggs & Bro., Rochester, N. Y.—Augusta, Me., Farmer.

G. M. DEL SMITH, Middleway, West Va. "My Trophy Tomato and Schweinfurt Cabbage was the first premium thought of you. We were the largest and most perfect ever grown here. The fairs in this part of the State will be too late for our vegetables, and I think the fair in Claysburg, Ohio, Clay Township, took a premium at the County Fair on Squashes. Seed from Briggs & Bro.—Logansport, Ind., Journal.

M. E. MUDDIE, of Augusta, Ark., took premiums on best Onions of Squashes at Woodruff County Fair. Seed purchased of Briggs & Bro.

Best Hubbard Squash, JOSEPH BROOKS. Seed from Briggs & Bro.—"Kewanee Enterprise.

At the Kewanee, County, Wis., Agricultural Fair, Edw. Bach took the first premium on Winter Squash; seed from Briggs & Bro.—Kewanee Enterprise.

MRS. FLETCHER ENOCHS, writing from Crystal Springs, Miss., says: "I exhibited the best variety of Vegetables at our County Fair, and they were raised from seed procured by our club from you, and I was awarded the premium.

SAMUEL WILLIAMSON of Clay township, took premiums at the County Fair on Tomatoes. Seed from Briggs & Bro.—Loganport, Ind., Journal.

W. H. FRY, gardener and seedsmen, Whitevale Gardens, Whitevale, Ont., says: The Trophy Tomatoes were splendid. We took both the first and second premiums at our Fair.

REV. L. J. DOUGHERTY took first premium with his Trophy Tomatoes at the Shelby County Fair. The seeds were obtained of Briggs & Bro.—Shelbyville, Ill., Union,

Best seven Turnips, R. H. RANDALL. Seeds from Briggs & Bro.—Appleton, Wis., Post.

Best half bushel White Rutabagas, C. A. RANDALL. Seed purchased from Briggs & Bro.—Appleton, Wis., Post.

JOHN MCKAY, of Columbus, Columbia Co., Wis., took first premium at the Columbus County Fair on Rutabaga Turnips. Seed procured from Briggs & Br.

JOHN W. NICHOLSON, Grattan, Mich.: "When I say that we get more seeds for less money and that every seed grew out at least so much, I only state the truth. I tried half an acre of your New Improved Mammoth Purple-Top Turnip, and although the season was dry, so very dry in fact, that the crop in question was an almost total failure, we harvested nearly three hundred bushels of as nice turnips as I ever saw, and at present writing (Jan. 12th) they are sound and apparently keeping well, or would be if the stock did not consume them with such avidity. I can recommend them.

S. G. FOSTER, second premium for Mangel Wurtzelt. Seed from Briggs & Bro.—"Kewanee Enterprise.

PHILIP TAYLOR, of Sherburn, Minn., exhibited at the Logan county Fair, twenty-five varieties, exhibited by Mrs. WALTER BOWMAN of Topsham, drew first premium. The seeds were bought of Briggs & Bro.—Brady, Va., Nat. Opinion.

MRS. WALTER BOWMAN, Topsham, Me., exhibited at the Logan county Fair, twenty-five varieties of Asparagus from seeds purchased of Briggs & Bro.—Farmers' Cabinet, Ansonia, N. H.

Best display of Asparagus, MRS. R. COY KENDALL. Seed from Briggs & Bro.—"Rome, Me., Sentinel.

J. B. BRINTER, of Brinker, N. J., exhibited at the Logan county Fair, twenty-five varieties of Asparagus from seeds purchased of Briggs & Bro.—"Rome, Me., Sentinel.

The seed you sent me,\[...\]n. B. The following were shown at the Logan county Fair, twenty-five varieties, exhibited by Mrs. WALTER BOWMAN of Topsham, drew first premium. The seeds were bought of Briggs & Bro.—Brady, Va., Nat. Opinion.

MRS. WALTER BOWMAN, Topsham, Me., exhibited at the Logan county Fair, twenty-five varieties of Asparagus from seeds purchased of Briggs & Bro.—Farmers' Cabinet, Ansonia, N. H., in 1918. This seed was asked by many persons as a novelty, and they would like to send where they could get the seeds true to name.
